Bull Sale

SUNDAY MARCH 10TH, 2024
DELTA COUNTY FAIRGROUNDS

BEST OF THE ROCKIES *Bull Sale*

SUNDAY MARCH 10TH, 2024

WELCOME SIMMENTAL ENTHUSIASTS,

We want to take this opportunity to thank past customers for their patronage and support and welcome you to our annual Best of the Rockies Bull Sale. We are very proud to offer the top 40% of our breeding program in this 2024 sale.

OUR BULLS ARE BRED WITH THE COMMERCIAL CATTLEMAN IN MIND. Our breeding program and breeding philosophies are directed toward producing moderate-framed, thick-muscled, deep-bodied, structurally correct cattle that will perform from the calving grounds to the rail. Our cattle are summered at 8,500-10,000 feet, assuring us that the PAP is managed and bred into them. The cattle that we can identify as superior performers in this environment are the same that can make a positive contribution to your herd. As a seed-stock supplier for the commercial industry, we feel strongly that our cowherd must run in similar conditions and be challenged in the same environment as our customers'.

Sincerely,

William D. Carsten

BEST OF THE ROCKIES *Bull Sale*

SUNDAY, MARCH 10TH, 2024

@ 1:00 P.M.

**DELTA COUNTY FAIRGROUNDS
HOTCHKISS, COLORADO**

DIRECTIONS TO FAIRGROUNDS:

431 FAIRGROUNDS HOTCHKISS CO 81419

Head south toward Crawford on HWY 92

Take a right on Doc Maloney Way

At stop sign take a left on River Lane

Parking for trailers- South of rodeo arena or steer barn

TERMS:

Terms of this sale are cash, or a good check, unless arrangements are made prior to the sale. Settlement is to be made immediately at the conclusion of the sale before animals are loaded. The right of property title shall not pass until checks have cleared. Once checks have cleared, bill of sale, and registrations (if requested) will be mailed to the provided address.

BIDDING:

All animals will sell as single lots to the highest bidder. The auctioneer, whose decision will be final, will settle any disputes or challenges regarding bids.

RISK:

All animals are at the owner's risk prior to their sale and become the property of the buyer as soon as the animal is declared sold by the auctioneer at which time the buyer assumes all risk.

HEALTH:

Every bull in this sale, to the best of our knowledge, is free of any disease and will be eligible for interstate transport. They have been vaccinated twice for IBR, P13, BVD, BRSV, 8-way Blackleg, Pyramid 5 with prespense, plus Enforce, and given Ivomec injectable and clean up in the fall.

ANNOUNCEMENTS:

Announcements from the auction block will take precedence over any printed matter, and any other announcements.

Catalog designed by:

KROSECOMPANY.COM

SALE DAY *Information*

GAURANTEE:

Every bull has been tested for Trich and semen evaluated by a licensed veterinarian. We will guarantee the bulls selling in this sale to be fertile at the time of sale. If the buyer chooses to have semen collected on a bull, Carsten Simmental cannot guarantee that the semen will freeze. We highly recommend that you buy insurance on the bulls that you purchase in case of sickness, death, or any other problem that might occur that prevents your bull from performing on the breeding grounds. Our breeding guarantee will not cover anything which might occur post-sale date.

SALE DAY LOAD-OUT:

All buyers loading the bulls the day of the sale will receive a trucking copy to release the bulls and will also receive \$50 off for every bull over \$3000. Credit will be applied at time of settlement.

KEEPING BULLS TILL 4/1:

At the buyer's option and risk, we will feed the bulls for free until April 1, 2024. After that date, there will be a feeding charge of \$7.00 per day/per bull, until the bull is picked up. We also provide free delivery up to 150 miles. Bulls MAY be delivered prior to April 1st at seller's convenience and prior arrangement and verbal notification of buyer. At time of settlement, please designate if you want the bull(s) fed by us or are hauling the bull(s) home that day. We highly recommend that you buy insurance on the bulls that you purchase in case of sickness, death, or any other problem that might occur that prevents your bull from performing on the breeding grounds. Our breeding guarantee will not cover anything which might occur post-sale date.

LIABILITIES:

Although accidents at livestock sales seldom occur, everyone attending this sale does so at their own risk. The owners and employees of Carsten Simmental and the Delta County Fairgrounds assume no liability, legal or otherwise, in the event of an accident, bodily injury, theft, act of God, errors in catalogs or omissions, or percentage verification. We try to keep the most accurate records possible and have bull-tight fences, but on a rare occasion, accidents of breeding occur that we are not aware of or cannot control. We will do everything we can to determine the correct parentage but cannot guarantee it.

REGISTRATION:

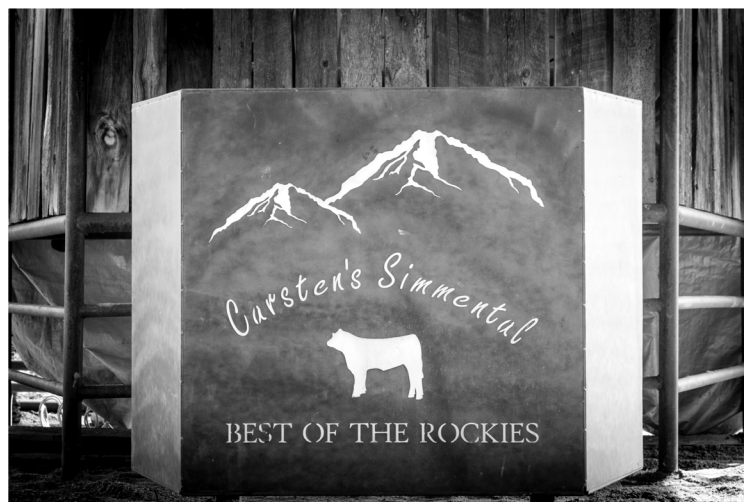

REGISTRATION PAPERS WILL ONLY BE FURNISHED IF REQUESTED AT THE TIME OF SETTLEMENT AT THE CONCLUSION OF THE SALE OR WITHIN 3 WEEKS FOLLOWING THE SALE. If requested later, buyer must pay additional registration fees. Please make sure that your mailing address is accurate and legible.

CONTRACT:

The above Terms and Conditions of this sale shall constitute a contract between buyer and seller and be equally binding to both. Animals that are resold following the sale shall constitute a separate transaction and the rights and obligations of the two parties connected thereto are not covered by these Terms and Conditions.

SUPPLEMENTARY SHEETS:

The day of the sale there will be supplementary sheets with PAP scores as well as scrotal measurements from fertility testing.

Accelerator is extremely deep-bodied, bold-ribbed, and powerful hipped for an Angus bull. He passes on his beautiful front end to all his offspring. Because he sires 65-78 lb. calves with more power than most Angus bulls, Accelerator is our go-to heifer bull. This bull also adds a ton of value on the maternal end, which is evident by an Accelerator-sired first calf heifer weaning an 840 lb. bull calf in the fall of 2023. As we flip through semen catalogs, we struggle to find bulls that have the balance between calving ease and light birth weights without giving up the power and quality. We have found by using Accelerator, we don't have to sacrifice "the look" we like so much in our Simmental cattle in order to achieve light birthweights and calving ease, which made our decision to finally pull the trigger on drawing semen on Accelerator this spring.

We fell in love with the stylish and handsome homozygous black and homozygous polled Handyman; he has all the tools in the toolbox to do the job and to get it done right with his outcross genetics. Handyman has an awesome front end with superior extension that ties into a nice, smooth shoulder, a massive middle, a strong top, an impressive hip and lower quarter, and he moves out with excellent flex in his hocks and pasterns on a big hoof. Handyman is our power bull that adds muscle and volume to his calves while still keeping the frame scores in check for mature size. Every year thus far he has sired one of our top calves. Even though we have only three daughters in production as of 2023, we will have eight more daughters calving in 2024, and we hope they have all the strong maternal qualities.

Yardley Excellence H428, also known as "Herbie" at the ranch, is big topped, massive hipped, and has a big hoof and excellent structural soundness. We purchased this bull in Yardley's 2021 Bull sale for \$14,000. His dam was the only red cow out of 800 head that met the qualifications to make it into the Yardley donor program, which should give you an idea how much they thought of her. Herbie is extremely long-sided and has a great disposition that is passed to his offspring. The females out of Herbie are extremely fancy-fronted, easy fleshing, and have more look than offspring of other red bulls that we have used in our A.I. program. It is really hard to find quality red genetics that keep the PAP scores low, and we have tried using a lot of different red bulls in our program. When we saw Excellence, we knew he checked every box to propel our red program, including his actual 34 PAP, which adds a ton of value to our program as well as yours as a cattleman running at higher elevation. We will have daughters in production this 2024 calving season, and we can already see that they are developing good udders with nice teat structures. We are excited to see how they develop and will have updated information here shortly on the females.

Sire

MCE	M	MWW	API	TI
8.4	16.9	51.5	115.3	74

Because we thought so much of our Clear Vision calves, we were very excited when we came across Clear Decision, a powerful bull with the same genetics. We saw the value in him the minute he walked into the ring and my daughter Ce'rra nudged me. We couldn't pass up the fact that we could have more Clear Vision genetics. The year that we purchased him, 3 of the top 5 selling bulls were Clear Vision sons, which verified our assumptions in the quality that Clear Vision has produced. Clear Decision has a kind and calm disposition. For a 5/8 blood bull, his sons that we have offered have as much or more power than any purebred bull that we have used.

You hope to hit a home run with your bull purchases, but we hit a GRAND SLAM with Clear Vision. His attractive profile, with a touch of chrome, which he passes to his offspring, is highly sought-after by calf buyers. His females are hands down, his finest attribute; they are moderate, big ribbed, easy fleshing, with big beautiful square udders and small teat structure and are some of the best females that have walked the ranch. From day one, Clear Vision C266 has been a stand-out and a favorite. His blaze face, great neck extension, perfect hair, and curve-bending numbers along with his massive depth, width, and bone, make him a true outlier. Clear Vision is sired by the deceased Shocking Dream, who is also the sire of STCC Long Haul. His individual numbers include a 36 PAP, an unheard of 19.8 in actual ribeye area, and a scrotal circumference of 40 cm.

We purchased OBCC County O 17XG out of the 2021 Bricktown National Simmental Sale for \$12,500 at 100% possession and 2/3 semen interest from Owens Brother from Missouri. County O exemplifies why we are all in the beef business. Here is a bull with a massive body cavity packed with red meat from his shoulder blade through his rear quarter. He has a show ring look but is very flexible and moves out soundly. His dam is a full sister to the breed matriarch Miss Werning KP 8543U who has generated more than \$8 million in actual progeny sales and is the highest valued Simmental donor in the business. He is sired by County O owned by Griswold Cattle Company. OBCC County O 17XG has been used heavily in our program and has produced a lot of good calves both male and female. His females have a lot of show ring look which is backed in this bull's pedigree.

Take your herd to the next level with the WRC Mr Unique, our Lot 1 bull - a powerhouse bred to bring out the best in your program. This eye-catching bull has been a ranch standout since day one, with a flawless blend of muscle, presence, and pedigree. His sculpted physique turns heads the moment he gets on the move, commanding attention with his smooth, symmetrical structure, ideal frame, with excellent feet and legs. B427, the dam of Lot 1, is the ideal cow. She packs a ton of muscle and power with a clean feminine front end. Her offspring have tremendous growth, milk production, and fertility - translating into higher profits for your operation with this bull. Bring out the full potential in your herd with WRC Mr Unique. Capitalize on his genetics and sire show-stopping, profitable cattle for years to come. He's the total package, and the opportunity to own this type of bull does not come along often, a cattle enthusiast's dream.

Searching for a herd sire that transmits maternal might? Meet Lot 11. This up-and-coming bull stems from one of our most prolific cow families - the 27 maternal cow family defined by ideal profiling, perfect udders, high milk production, and fertility. With a dam that's a Lock Down daughter, Lot 11 promises more of the same. His offspring will be moderately framed, fertile, and heavy milking thanks to his outstanding cow-family genetics. If you're looking to upgrade your herd with a bull that passes on productivity and profit-building maternal traits generation after generation, Lot 11 brings the total package. His power, style, and impressive spread of numbers make him a herd sire that takes your operation to the next level.

Make a bold genetic investment with Lot 13 WRC Mr All Aboard. This puppy-dog-gentle red bull brings an ideal combination of eye appeal and thickness. His big square hip and deep girth give him that powerful profile, while his red coat is sure to catch attention, while being a non-diluter- making him ideal for producing eye-catching red or black calves. His attractive Lock Down dam boasts a shapely frame and full udder. For cattlemen seeking a herdsire to take their red program to the next level, Mr All Aboard fits the bill. This bull will sire calves with style, substance, and salable looks – an unbeatable combination!

We have admired this red bull sired by the red baldy bull W/C Cyclone from day one. Here is a bull that sports a massive hip, bold rib, and exceptional wheels with excellent structure. Lot 14 WRC Mr Cyclone delivers the complete package for red lovers. He comes from our top phenotypical red cow at the ranch that possesses a shapely udder with great teat attachment and excellent feet and legs. Let Lot 14 take your red herd to the next level with his blend of genetics, performance, eye appeal, and maternal strengths. For those who feel that redder is better, there may not be a bull (red or black) in this year's sale better than WRC Mr Cyclone. There are not enough good things to say about this red bull.

The power and length this bull embody the qualities that commercial cattlemen seek. However, it is the daughters of Frosty that have captured our hearts here at the ranch. Their beautiful udders and teat attachments, milking ability, and maternal instincts are unmatched, and we eagerly anticipate their impact on our program in the coming years. Lot 15's dam, a CCR Frontier of slightly larger stature, has consistently produced some of our heaviest and most productive calves. The phenotype, mature size, and maternal abilities of Lot 15's maternal sisters attest to the superior PROVEN genetics that are backed behind this bull.

Looking for a bull that boosts milk and weaning weight? Lot 16 WRC Mr Frosty is your solution! This stoutly-built bull delivers balanced EPDs and proven genetics ideal for commercial Simmental herds. Sired by a larger-framed bull with excellent maternal traits and out of a moderate, high-volume PVF Insight cow, Mr. Frosty sires fast-growing calves and highly productive daughters. His exceptional EPDs for maternal milk and weaning weight make him a smart investment for cattle producers wanting more pounds to sell. Bring profitable genetics home - add Lot 16 WRC Mr Frosty to your bull battery!

Attention-grabbing performance in one smooth-moving brockle-faced package! Lot 17 WRC Mr Frosty is a bull that brings easy-going temperament and top-notch genetics to the table. This heavy muscled free free-flowing bull could improve offspring performance with his combination of smooth shoulders, volume, power, and excellent length. He goes back to one of the most influential female lines that has ever been in production at our ranch: the 30-cow family. His dam, a heavy milking Fat Butt daughter, passes on her broody phenotypical appearance to her son. Lot 17's dam has produced many top sellers over the years. If you like bulls that are super profiling and have the growth to sire heavy calves at weaning, then this bull should be on the top of your list.

WRC Mr TJ Frosty offers exceptional genetics for your livestock with his unique outcross pedigree of TJ Frosty and an LMJJ Impartial dam. This pedigree is a must-have, especially if you want to make beautiful females. Lot 18's dam is one of the top cows in our herd and would make a great model for your masterpiece. If you seek a stylish, sound, blaze face and cool-headed calf, Lot 18 is for you. We chose Frosty due to his excellent EPD profile, especially his calving ease numbers. Though we don't show cattle, we believe Lot 18's full sister would be the best show prospect of the 2022 females, she is by far Ce's favorite first calf heifer.

With Lot 23 WRC Mr Epic, you get the complete package: a bull bred for both performance and pedigree. As a full brother to 2021's record-setting \$14,500 sale topper, this bull brings a unique pedigree. His Yardley Lad dam is a perfectly made cow with a full udder, ideal teat size, and she weans some of our top calves. Backed by a dam that excels at raising fast-growing, efficient calves, this bull will sire the kind of offspring commercial producers dream about - calves that hit the ground running and have the genetics to excel all the way to the rail.

Scott Long & Family

I started ranching alongside my Dad in the early 2000's. In the winter we run cows down in the desert of western Colorado and in the summer we run them up on the Grand Mesa. My Dad was a Best of The Rockies customer, so naturally when I started ranching, I went the same route. I started with some Beef Master/Limousine/Hereford cross cows and with the first 6 bulls purchased from the Best of The Rockies and with different feed management we had a 75 lb gain in our steers that fall. Now, after over 20 years of using Best of the Rockies bulls, our cow herd is mostly all Best of The Rockies genetics- 300 head. Our cows have shown to have longevity of up to 15 years and continue to produce high quality calves. Our steer calves continuously average 780-820 lbs in the fall when we pull them off the cows to ship. When we calve out, the cows are on open range and typically they have no issues calving and we've had a pretty high success rate. Our replacement heifers have proven to be good mothers with nice udders and dispositions. The bulls have always been easy to work, when it comes to trick testing and gathering to put with the cows in the spring. We are grateful for the hard work they put into their cattle at Best of The Rockies because it passes down to our cow herd which continues to help us improve our own herd on the Long Ranch.

Here is a bull with a long-side, ample muscle, and a stylish black coat. His dam is one of the prettiest and most productive Clear Vision daughters of the 2017 females, consistently staying fat and producing top calves. While she usually has heifer calves, this muscular bull calf offers a chance to benefit from the excellent OMF Epic X Clear Vision genetics. With the full continental influence on both sides of the pedigree, this bull calf's feeder calves will be in high demand. Bring stylish genetics and profit potential to your herd with Lot 26.

Brian Olomon and Leonard Olomon

We are proud to offer our testimony for Carsten Simmentals and their excellent program. In the fifteen years that we have been purchasing Carsten bulls, we have seen the quality of our calves continually improve. Not only have we drastically reduced the high mountain sickness due to the bulls' healthy PAP scores, but their calves also wean 50-75 lbs higher. We've noticed better feet and bags on our cows; more bone and good conformation in their offspring. If you are in the market for quality bulls to add to your home program, you have found them here.

Lot 28, WRC Mr Cyclone, is arguably the most stylish and best fronted red or black bull in this year's offerings. With the maternal side of this bull tracing back to one of Taylor's best club calf cows, he exhibits the exceptional style and beautiful front end of his dam's family. Lot 28 has a maternal sister in her first year of production, and she is about as picture perfect as it gets. She has a large, square udder with excellent teat placement and structure. We joke with Taylor about switching tags on her cows when she is not around. After seeing her in production-she would be first on the list. A cattlemen seeking to clean up some large-ribbed, heavy fronted old school cattle, Lot 28 would be an excellent choice.

WRC Mr Lover Boy L29 is a great example of why we are excited about Lover Boy's continued success in our breeding program. Lover Boy's offspring have calving ease and average to lighter birth weights, these traits contribute to the vigor of the calves. His Clear Vision dam shows the moderation, large ribcage, and muscularity typical of Clear Vision daughters. Although she fell behind as a first-time heifer (calving in late March), she has since recovered and calves early-to-middle of our January/February calving season. It's rare for heifers to recover after a delayed first calving, but we recognized this cow's fertility would be an asset.

Lot 37, WRC Mr Clear Decision, is a superbly built bull with excellent genetics. He has inherited his sire Yardley Clear Decision E454's wide top, strong performance, and ideal traits. His dam, a Clear Vision daughter, also contributed with her perfect phenotype - a moderate, huge-ribbed, easy-fleshing frame. Phenotypically, this bull mirrors her. Here is a growthy bull with a great EPD profile and genetics that make him a top choice for siring thick, robust calves

Lot 38 is out of an elite, moderate SCC Apache Brave dam that is heavy-milking with an exceptional udder. She has all the "look" and throws calves with a ton of growth and eye appeal. If you're searching for cattle that check every box, Lot 38 is the total package. His genetics give you the best of both worlds - cattle that perform come weaning day without sacrificing eye appeal. With Lot 38, you get optimum growth, flawless phenotype, and females with elite maternal traits.

Burch Family Ranch

Here at the Burch Family Ranch we have been buying Carsten bulls for a few years now. We run on the Uncompahgre Plateau up to 10,500 ft in elevation and we have no problem with altitude. They can handle any types of conditions that mother nature might throw at them. From calving ease to weaning weight, we love watching these cattle grow and we are always very excited to pick our replacement heifers from these genetics. Thank you to the Carsten Family for all your hard work!

Here's a long-bodied, solid black bull sired by OMF Epic E27, with the potential to produce moderate-sized calves. However, his most notable attribute is his ability to sire excellent female offspring. His mother, a moderate-framed Upgrade daughter, boasts a flawless udder and consistently produces heifer calves that possess exceptional milking ability, fleshing ability, and fertility. We are so impressed with these traits that we automatically retain these heifers in our program. It is without a doubt that this bull will pass on these outstanding maternal traits to his offspring, making him a valuable addition to any herd. The dam of Lot 39 raised both calves and produced over 1,500 lbs of weaning weight.

Out of one of the best cow families at the ranch, the dam of Lot 41 is a maternal sister to the top-selling bull of the 2023 Best of The Rockies bull sale, which went to Taramarcas Ranches in Gunnison, Colorado for \$9,500. The daughters in this family have small to moderate genetic make-up and consistently wean calves at 70-75% of their body weight, demonstrating excellent maternal ability. Lot 41's dam is a maternal sister to the dam of Lot 14. When evaluating the offspring of this exceptional cow family, their strong maternal capabilities are evident.

In the cattle industry's pursuit of higher weaning weights, moderation and fleshing ability in cattle have often been sacrificed for larger-framed, faster-growing animals. However, Lot 44's sire, Epic, demonstrates that this trade-off is unnecessary. Many heavily promoted AI sires prioritize high API and TI scores at the expense of visual appeal and natural fleshing ability, cattle traits registered and commercial breeders need to stay in business. Overly large, hard-keeping cattle lack the fertility and longevity to sustain the industry long-term. While Lot 44's dam has consistently produced quality offspring for us, she has only had heifers so far.

This solid red bull, Lot 50, comes from an excellent cow family at the ranch, tracing back to the great ER Big Sky on the dam's side. He has a maternal sister (dam of lot 51) currently in her second year of production. She exhibits the same outstanding qualities as their dam Y160. With a milk EPD of 26.9, this bull will surely pass on excellent milking ability to his daughters. His 13-year-old dam is a deep-bodied, soft-muscled, stylish cow with a tight udder that, unfortunately she was open this year, so this is the last chance at her excellent red genetics. We will certainly miss this fantastic red super mama.

Here is an incredible match-up of WRC Mr Sniper from the 2019 Best of The Rockies bull sale by IR Imperial. IR Imperial is a purebred red bull, used for his extreme calving ease. We feel like we hit a calving ease homerun with this combination. Lot 51 started at a mere 58-pound birth weight. However, despite its petite size, the calf displayed exceptional growth, weaning at an impressive 810-pounds. This could be the best calving ease bull offered (red or black). His milk EPD is not a reflection of the type of milk Lot 51's dam and grand-dam have (dam to Lot 50). The amount of milk his dam possesses is very apparent in the daily rate of gain on this calf.

When evaluating our first calf heifer group, it takes a darn good one to keep in the replacement pen or the bull pen since we have built our herd back up to 300 cows. The competition is tough around here. In assessing this calf's performance, the quality reflects the potential of the first calf heifer dam of Lot 61. This bull traces back to a big-ribbed Good Enuff daughter we sold to Mitch Hart in our Ruth Carsten Dispersal. She was a beautifully made, red cow, with tremendous volume and ideal style. We were fortunate to buy back a daughter of hers, the granddam of WRC Mr Lover Boy L61. There are three generations of red on the dam's side in this bull's pedigree. We feel this bull's most valuable asset is his calm, docile temperament. He would work great on a small family ranch or an operation that is really hands on.

The maternal bloodlines of WRC Mr Handyman's cow family trace back to the foundational '55 line. These Simmental cows embody the ideal: attractive, feminine, angular, and broody. Longtime buyers know we've worked diligently to enhance calving ease, structure, and udder quality in this herd. We invest significant time selecting and keeping cows with clean fronts, easy fleshing, and visual appeal. Lot 62's Clear Decision dam is a clear example of our breeding goals, with an outstanding udder, sweet temperament, and natural fleshing ability that support our herd's foundation. Lot 62 is the best fronted bull in this year's offerings, use this bull to clean up some heavy fronted old school genetics.

Lot 63 offers an impressive combination of depth, dimension, and visual appeal in a well-balanced, easy-to-manage package. As the second youngest bull in this year's sale, Lot 63 faces tough competition. However, his outstanding traits suggest that if he were 45 days older, he would rank in the top 20 percent of this year's bulls. We haven't calculated daily 205 weight but we believe he'd be at the very top. A few years ago, Lot 63's dam gave birth to a calf that seemed abnormal from the start. Since we did not witness the birth, we could not determine what went wrong. We eventually had the cow near the barn in the pen with cows that had twins. Sadly, we could not save her first calf. Before long, she adopted a twin calf entirely on her own, without any intervention from us. A true testament of the strong maternal instincts and the value of this cow.

Lot 64 combines an impressive EPD profile with a balanced, eye-catching phenotype that promises long-term genetic progress. His outstanding B C Lookout dam, Y157 (a 13-year-old) is a cow that has all the qualities: phenotype, mature size, udder quality, fertility, and overall value. I wish we knew the dollar figure this cow has produced for the ranch in her lifetime, but I am guessing she has more than paid her dues. For producers seeking predictable performance, Lot 64 WRC Mr Eagle fits the bill. His balanced phenotype and genetics promise to add substance, style, and consistency.

This thick, deep bull combines an eye-catching silhouette with sought-after genetics. He maintains a sturdy, muscular build packed with thickness from front to rear. His dam, A371 is a beautiful maternal powerhouse who is big-bellied, easy-keeping, and great dispositioned female, and she is the kind that makes you look smart on matings with her ability to consistently produce. This bull is going to make some mouth watering replacement females who will milk exceptionally well, have easy flesh ability, and functionality, all while loaded with excellent udders and longevity. This bull had a maternal brother in last year's sale that went to longtime friends, McCabe Ranch in Snowmass Colorado for \$6,000.

Lot 66 is an easygoing Yardley Handyman G284 son with excellent performance and EPD numbers. Handyman, his sire, provides outcross genetics from the W/C Banchor 46D and a top Yardley Cattle Company donor cow. He has an awesome front end with great extension flowing into a smooth shoulder, massive middle, strong top. We paid \$6,500 for his Hook's Bozeman dam who came from Cook's Bridle Bit Simmentals. Lot 66 offers outcross genetics from previous sales.

Check out this chunk! With the genetics of Lot 67 WRC Mr Handyman, your calves will have the ideal blend of moderation and power. This bull delivers a visually stunning style sure to catch attention, while still ensuring practical maternal strength and fleshing abilities from his outstanding dam. He brings together the best of both worlds - calf quality and maternal fortitude. For cattle producers seeking to add mass, volume, and maternal power without sacrificing calf quality and market appeal, Lot 67 WRC Mr Handyman is the clear choice. His genetics will give your herd the boost it needs, improving calf marketability and the bottom line while maintaining the easy-fleshing, big-ribbed females your operation depends on.

Lot 68 WRC Mr Fast Pace - this bull calf will bring easy calving and excellent milking genetics to your herd. I always have buyers who would like for me to identify the top calving ease prospects, so when I evaluate for the calving ease traits, the bull must not only have a lighter birth weight but also have calving ease EPD and the genetic make-up that I can positively identify to meet these standards. The dam must be consistent in her ability to throw light birth weight calves year in and year out. Lot 68's dam is out of a typical IR Shear Force sired cow that has BETTER milking ability and teat structure than Shear Force females themselves as well as quite a bit more performance. This is the YOUNGEST calf in the sale. This bull has scurs.

Lot 69 WRC Mr Handyman boasts a pedigree primed to improve your herd. This handsome younger bull descends from a phenomenal Clear Vision daughter known for her perfect udder and top notch phenotype. She goes back to an extremely good Fatt Butt cow. Mr Handyman inherited his dam's strong genetics, including her balanced frame, with eye-catching blaze face. Lot 69's great-grandmother was a beautiful red Dream On cow, which we originally purchased from Iowa for \$6,500. There is a long line of beautiful producers in this bulls pedigree.

Lot 70 is a calm and easygoing Clear Vision son with strong performance and pedigree. He stems from our elite '49 cow family and has a smooth shoulder and narrow head. His dam is a standout, moderate nine-year-old Top Grade daughter known for producing top calves every year. A full first calf heifer sister to this bull is developing an incredibly beautiful udder and has a docile personality. She is the type of cow that makes it challenging to move them around when they are trying to lick you in the face.

Lot 71 WRC Mr County 0 descends from a moderate-sized Big Timber dam with an ideal udder and teat structure. This bull's pedigree traces back to the '09 cow family, with his granddam being a top daughter of Top Grade. When evaluating top cow families, this '09 family has to be one of the best. Evident in the daughters of WRC Miss Top Grade D609 has produced. D609 has multiple daughters in production that are highly profitable and outperform others in their age group. (Dams to Lot 60 and 67 are daughters of D609.) The family's maternal performance is clearly a standout trait. WRC Mr. County 0 should sire moderately-sized calves with good muscling and fleshing ability.

A couple years ago we were fortunate to purchase Lot 72's dam from Marshall Cattle Company's complete dispersal sale. Lot 72's dam, out of MCC Equity, ranks in the top 5% of the breed for calving ease and the top 2% for marbling. Lot 72 has outstanding EPDs reflecting feedlot performance and carcass quality. With this cross of genetics, calves will excel in the feedlot, put on weight and achieve a higher quality grade. For operations focused on carcass merit, this bull offers tremendous genetic potential to improve bottom lines.
