McCLUN'S

Lazy JM Ranch

SPRING SALE

LOT 4

LOT 9

LOT 25

LOT 27

Welcome

Each year we say we say the bulls are better than ever. But it's true, this is the best set of bulls we've ever produced. We believe that if you are not moving forward, you are going backwards. As you will find in the sale offering, this set ranks in the top 20% in nearly every category amongst the entire breed of both breeds. Several bulls are suited well for Herd Sires in registered herds. Look them over closely.

We demand that our bulls be useful to their buyers. They must be able to walk, not be over conditioned, be able to be handled without threat to human life, and most importantly, go breed cows. Further, we offer a warranty that is second to none. We believe in these bulls and in your need for a quality product.

As in the past, the bulls will sell in catalog order. No flipping back and forth for the sale order. In doing this we have split the bulls into different groups (note the sections in the catalog) and the depth of quality goes all the way through to the end. We encourage you to take a serious look at the catalog in its entirety.

Again, this year, we have a few PAP tested 18-Month-Old Fall Bulls that were tested by Dr. Tim Holt in Walden, CO, at 8,200'. During the six weeks they were on site, these bulls did quite well and we are extremely happy with their scores. We've had very few issues with our bulls performing at elevation and stand behind them all.

Please feel free to give us a call with any questions. We look forward to seeing you on sale day if you can make it—if not, we understand how it goes. We will once again broadcast the sale on DVAuction.com, and videos can be viewed at your convenience. We have made every effort to accurately present this set in this year's catalog and videos—the pen is not filled with straw to hide their feet or make them appear deeper than they are. We have nothing to hide and neither do our bulls! Visit www.McClunRanch.com to view the videos and to login to [DVAuction](http://DVAuction.com).

Sincerely,

The McCluns

"For I know the plans I have for you," declares the Lord. "Plans to prosper you and not harm you, plans to give you hope and a future." (Jeremiah 29:11)

McCLUN'S LAZY JM RANCH SPRING SALE

TORRINGTON LIVESTOCK MARKET - THURSDAY, APRIL 13, 2023 - 1 PM MDT

Selling: 101 Head of Angus and Polled Herefords! 30 Angus Yearlings, 12 PAP Tested Angus Fall Bulls & 3 Angus Two-Year-Olds, 30 Hereford Yearlings, 9 Hereford Fall Bulls, & 17 Hereford Two-Year-Olds

SALE LOCATION:

Torrington Livestock Market, 626 West Valley Road, Torrington, WY 82240.

SALE DAY PHONE: 307-532-3333

AUCTIONEER:

Lander Nicodemus, 307-421-8141

MOTEL ACCOMMODATIONS:

Holiday Inn Express Hotel
1700 East Valley Road, Torrington
307-532-7600

Cobblestone Hotel & Suites
1306 Main Street, Torrington
307-532-1033

INSPECTION OF CATTLE:

Cattle will be available for inspection on Wednesday, April 12th at the sale site. The cattle may be viewed at the ranch anytime prior to the sale.

FEEDING:

We will take all bulls home and feed them until May 1, 2023, **FREE** of charge. Take your purchase home on sale day and receive \$100 off per lot.

GUARANTEE:

All cattle selling are guaranteed to be fertile and sound. All the bulls were semen tested. First breeding season guaranteed – the period from sale date to October 1, 2023, unconditional guarantee with the exception of loss resulting from mismanagement. Bull will be replaced if a suitable replacement is available. If not, credit will be given on next year's sale for purchase price less any salvage received by owner. Notify us immediately with any problems.

HEALTH:

All cattle have Clean-Up and SafeGuard parasite control. All have been vaccinated with Alpha 7 + C&D at birth, Vision 7 Somnus and Nasalgen 3-PMH at branding and preconditioning, Pinkeye, and two doses of Footrot.

BRAND INSPECTION:

All cattle will be accompanied by proper brand inspection papers at time of shipment. A brand inspector will be available sale day.

LIVESTOCK REPRESENTATIVES:

Livestock Plus, Inc.....Randy Rasby.....308-539-6195
Western Livestock Journal.....Jim Gies.....970-590-0500
Wyoming Livestock Roundup.....Curt Cox.....307-630-4604
High Plains Journal.....Bud Mears.....785-405-0376

TERMS & CONDITIONS:

All cattle sell according to the standard terms and conditions of the American Angus Association and American Hereford Association.

SIGHT UNSEEN PURCHASE GUARANTEE:

If you are unable to attend the sale you may call or send bids to any of the representatives, auctioneer, or owners. We guarantee that you will be happy with your purchase or you don't own them. We will bid for you as if it were our own money, ensuring the customer is satisfied with their purchase.

RETAINED INTEREST:

We will retain 1/3 breeding interest or revenue interest on all bulls in the sale. Buyer owns full possession and use of all bulls in the sale, unless otherwise announced.

TRUCKING:

We will deliver **FREE** on any lot selling for \$3,000 or more, or a total purchase of \$5,000, up to 250 miles. See us for other delivery arrangements. We will be glad to assist in making the best possible trucking arrangements.

INSURANCE:

Will be available sale day through Jim Gies, a Harding & Harding agent.

LIABILITY:

All persons attending this sale do so at their own risk, legal or otherwise for their safety or the behavior of the animals. The Owners, Auctioneer, and Sale Staff assume no liability for property loss or any accidents that may occur.

ANNOUNCEMENTS:

Announcements from the block will take precedence over the catalog.

LUNCH:

Complimentary lunch served at noon.

ONLINE BIDDING:

The sale will be broadcast live on DVAuction.com. Make sure to register prior to sale day to ensure successful bidding.

MANDIBULOFACIAL DYSOSTOSIS (MD) NOTE:

Recently, there is a new genetic defect in Hereford cattle. The defect results in a deformed lower jaw of the affected calf. This is a simple recessive gene, so the only way it can be a problem is if two carriers are mated together. It is important to note that this defect does not carry through to other breeds. There are no known carriers in the sale. However, Lots 45, 105 and 119 are listed as "potential" and have not been tested for the defect.

LOT 27

NOT LOCAL TO US? NO PROBLEM!

We can arrange delivery! Example: Customer lives 500 miles away. We meet halfway; no charge. OR: We bring purchase full distance: \$1/mile beyond 250 miles = \$250. However: If total purchase is over \$10,000; no charge.

Keep in mind: We try to put together loads along a common route, so please be flexible with delivery date, but don't let distance be the issue! We will do our best to make it reasonable!

- HEREFORD - 2-YEAR-OLD BULLS -

THANK YOU FOR YOUR CONSIDERATION OF OUR OFFERING!

Final thoughts:

In a world where "Business as usual is changing almost daily—the business, and the usual," we feel there is great value in things that never change. We would like to take pride in the fact that we continue to do business the way it used to be. We know our customers by name and do business with a handshake. Many of our customers have been with us for decades. This is not something that happens by accident. Standing behind our product and insisting on honesty and integrity is how we have made it this far. We have been selling bulls for 49 years now, and we are into the 5th generation in the family.

If there are two things we would ask for, Lord, it would be for a little rain and some real guidance in Washington. We sure could use it.

Please call with any inquiries. If you are not local to us don't let trucking be the issue. We can meet halfway or share the cost with the buyer. We are more than happy to accommodate in any matter possible. In fact, it's our job.

God Bless.

PAP RISK FLOW CHART

Timothy N. Holt, DVM
Lisa Herrick, Certified PAP Technician

Location of PAP Test: Walden, Colorado
Elevation: 8,175 feet

PAP Risk Factor High Elevation Test Chart
PAP Test conducted at elevation >7,500 feet
For a stay at elevation for 6 weeks (75-90% Repeatable, Predictive Value)

PAP Score	Use at Low Elev. (<4,000 ft.)	Use at Moderate Elev. (4,000-5,000 ft.)	Use at High Elev. (5,500-7,500 ft.)	Use at Extreme Elev. (7,500 ft. +)
34-41	Low Risk	Low Risk	Low Risk	Low Risk
42-44	Low Risk	Low Risk	Low Risk	Low Risk
45-49	Moderate Risk	Moderate Risk	Moderate Risk	High Risk
> 50	Moderate Risk	Moderate Risk	High Risk	High Risk

- When selecting an animal based on a PAP measurement, other factors besides those listed above should be considered, such as genetics or pedigree, PAP EPD's, Systolic/Diastolic pressures, breed, and previous illness.
- Special consideration should be given to the amount of time the animal was exposed to elevation (>5,500 feet) prior to testing. The predictability and repeatability of the PAP measurement improves with longer the exposure to higher elevation (minimum of 3 weeks is required).
- This chart is based on animals greater than 10 months of age. Testing older animals (>12 months) results in a higher predictive and repeatability measurement.
- Testing of younger animals (<10 months) may result in a greater variability to the predictive and repeatability measurement.

DEFINITIONS:

- **Repeatable or Repeatability Percent:** This is a term used to give strength to a given PAP score predicting that if a retest PAP was carried out later in life, then the score would be close to or within the same category as the original measurement. For example; a PAP measurement taken below 4000 feet only has a 40% repeatable percent meaning that a repeat test only has a 40% chance of staying within the same risk category as the original test.
- **Predictive Value:** This term is closely related to repeatability percent but specifically says that the original score can accurately predict what that animal will retest in a higher elevation.
- **Risk:** Defined as the likelihood of an animal developing pulmonary hypertension themselves or being at risk for having a genetic predisposition for the disease.

EPD DEFINITIONS:

Calving Ease Direct (CED), is expressed as a difference in percentage of unassisted births, with a higher value indicating greater calving ease in first-calf heifers. It predicts the average difference in ease with which a sire's calves will be born when he is bred to first-calf heifers.

Birth Weight EPD (BW), expressed in pounds, is a predictor of a sire's ability to transmit birth weight to his progeny compared to that of other sires.

Weaning Weight EPD (WW), expressed in pounds, is a predictor of a sire's ability to transmit weaning growth to his progeny compared to that of other sires.

Yearling Weight EPD (YW), expressed in pounds, is a predictor of a sire's ability to transmit yearling growth to his progeny compared to that of other sires.

Maternal Milk EPD (Milk), is a predictor of a sire's genetic merit for milk and mothering ability as expressed in his daughters compared to daughters of other sires. In other words, it is that part of a calf's weaning weight attributed to milk and mothering ability.

Marbling EPD (Marb), expressed as a fraction of the difference in USDA marbling score of a sire's progeny compared to progeny of other sires.

Ribeye Area EPD (RE), expressed in square inches, is a predictor of the difference in ribeye area of a sire's progeny compared to progeny of other sires.

Fat Thickness EPD (Fat), expressed in inches, is a predictor of the differences in external fat thickness at the 12th rib (as measured between the 12th and 13th ribs) of a sire's progeny compared to progeny of other sires.

Maternal Weaned Calf Value (\$M), an index, expressed in dollars per head, predicts profitability differences from conception to weaning with the underlying breeding objective assuming that individuals retain their own replacement females within herd and sell the rest of the cull female and all male progeny as feeder calves. The model assumes commercial producers will replace 25% of their breeding females in the first generation and 20% of their breeding females in each subsequent generation. Traits included are as follows: calving ease direct, calving ease maternal, weaning weight, milk, heifer pregnancy, docility, mature cow weight, claw set and foot angle.

Weaned Calf Value (\$W), an index, expressed in dollars per head, to predict profitability differences in progeny due to genetics from birth to weaning. The underlying objective being producers will retain 20% of the female progeny as replacements and sell the rest of the cull females and their male counterparts as feeder calves. Traits included are as follows (in no particular order): birth weight, weaning weight, milk, and mature cow weight.

Feedlot Value (\$F), an index, expressed in dollars per head, to predict profitability differences in progeny due to genetics for postweaning feedlot merit compared to the progeny of other sires. The underlying objective assumes producers will retain ownership of cattle through the feedlot phase and sell fed cattle on a carcass weight basis, but with no consideration of premiums or discounts for quality and yield grade. Traits contributing directly to the index are as follows: yearling weight (gain), carcass weight and dry-matter intake.

Grid Value (\$G), an index, expressed in dollars per carcass, to predict profitability differences in progeny due to genetics for carcass grid merit compared to progeny of other sires. The underlying objective assumes producers will market cattle on an above-industry-average carcass grid. Traits included in the index are as follows (in no particular order): carcass weight, marbling, ribeye area, and fat.

Beef Value (\$B), a terminal index, expressed in dollars per carcass, to predict profitability differences in progeny due to genetics for postweaning and carcass traits. This terminal index assumes commercial producers wean all male and female progeny, retain ownership of these animals through the feedlot phase and market these animals on a carcass grid. Traits included in the index are as follows: yearling weight, dry-matter intake, marbling, carcass weight, ribeye area and fat.

Combined Value (\$C), an index, expressed in dollars per head, which includes all traits that make up both Maternal Weaned Calf Value (\$M) and Beef Value (\$B) with the objective that commercial producers will replace 20% of their breeding females per year with replacement heifers retained within their own herd. The remaining cull heifer and steer progeny are then assumed to be sent to the feedlot where the producers retain ownership of those cattle and sell them on a quality-based carcass merit grid. Expected progeny differences (EPDs) directly influencing a combined index: calving ease direct (CED) and maternal (CEM), weaning weight (WW), yearling weight (YW), maternal milk (Milk), heifer pregnancy (HP), docility (DOC), mature cow weight (MW), foot angle (Angle), claw set (Claw), dry matter intake (DMI), marbling (Marb), carcass weight (CW), ribeye area (RE) and fat thickness (Fat).

CALVING EASE STAR RATINGS:

**Bull is recommended
HIGHLY for use on cows**

**Recommended for larger heifers
or cows with more management.**

**Bull is recommended HIGHLY for use
on heifers and to sire light BW calves.**
