**Fall 2022**

**Bull Sale Catalog**

*Angus — Red Angus*

*Polled Hereford — Heat-Tolerant*

**537 Grass-Developed Bulls**

**Four Bull Sales**

**Dear Friends,**

*As expected, cattle prices continue to go higher, higher, higher. This is a result of a shrinking cattle inventory. The shrinking inventory is partially a result of the widespread drought. The same thing happened in 2014 and 2015 when calf prices went through the roof and beyond. Calves are expected to be worth at least \$150 more per head this fall than they were last fall.*

*When it rains again — and it will — we will receive prices higher than we've ever seen before. Do what you can to take advantage of the good times — but don't forget the good times won't last long. Once supply catches up to demand, prices will fall. We urge you to take advantage of the high prices while they last to change the things you need to change. It's extremely difficult to make the required changes when prices are down, because survival takes precedence over all else.*

**Kit and Tyson Pharo**

*We do much more than just sell bulls. We provide a program and a way of thinking that are focused on helping you make your business as profitable, enjoyable and sustainable as possible. Our low-maintenance bulls are just one part of this program. There's a reason our customers are the most profitable cow-calf producers in the world.*

# FOUR Fall Bull Sales

❖ Monday, November 7, 2022 ❖

At 1:00 PM (MT)

Burlington Livestock Exchange  
46277 US Hwy 24  
Burlington, Colorado

*Just west of town on old Highway 24*

Lunch will be provided by PCC prior to the sale

## COLORADO

### Hotel Accommodations:

*Best Western Plus*.....719-346-7777  
(Ask for a Pharo Cattle Company **Discount Rate**)

*Fairfield Inn & Suites*.....719-346-7094  
(Ask for a Pharo Cattle Company **Discount Rate**)

❖ Saturday, November 12, 2022 ❖

At 1:00 PM (CT)

Mid State Stockyards LLP  
8415 State Highway 97 S  
Letohatchee, Alabama

*South of Montgomery just off Exit 151 of  
I-65 (Highway 97 South)*

Lunch will be provided by PCC prior to the sale

## ALABAMA

### Hotel Accommodations:

*Holiday Inn Montgomery Airport*.....334-288-3858  
Montgomery, Alabama

(Ask for a Pharo Cattle Company **10% Discount Rate**)

❖ Saturday, November 19, 2022 ❖

At 1:00 PM (MT)

Headwaters Livestock  
25 Wheatland Road  
Three Forks, Montana

*NW of Three Forks just off Exit 274 of I-90*

Lunch will be provided by PCC prior to the sale

## MONTANA

### Hotel Accommodations:

*Sacajawea Hotel*.....406-285-6515

(Ask for the Pharo Cattle Co. **"Bull Sale" Discount Rate**)

❖ Saturday, December 3, 2022 ❖

At 1:00 PM (CT)

Valentine Livestock  
126 N. Government  
Valentine, NE

*Just east of downtown Valentine*

Lunch will be provided by PCC prior to the sale

## NEBRASKA

### Hotel Accommodations:

*Niobrara Lodge*.....402-376-3000  
(Ask for a Pharo Cattle Company **Discount Rate**)

*Comfort Inn*..... 402-376-3300  
(Ask for a Pharo Cattle Company **Discount Rate**)

Cody McDaniel: 844-541-5412

# Selling Bulls for 32 Years . . . . . . and Counting

## *Sale Information*

**Only the best sell.** These **537** ranch raised bulls uniquely represent both our philosophies and our breeding program. They have been carefully bred and selected to meet the demands of the commercial cowman. Several herd mates that did not live up to our expectations have already been culled. We keep extensive records on our cattle and we follow a very strict selection and culling program that is based on facts and figures, as well as on frequent observations and evaluations.

**Cataloged.** The bulls have been cataloged according to the sale they will be sold in and their breed groups. Each bull will be identified with a lot number that corresponds to the number on his PCC ear tag. We will sell the bulls in lot order — from low to high. For the most part, the bulls will be cataloged by sire groups (1/2 and 3/4 brothers). This will make it easier for you to purchase a set of bulls that are closely related. We will start each sire group with the highest rated bull in that group.

We have provided extensive information on each bull to help you make the right selections. This information is explained on page 8. We urge you to look for bulls that are strong in the traits your cowherd is weak in, but always remember to keep “balance” in mind because single trait selection can quickly wreck a cowherd. Registration certificates on all registered bulls will be transferred to the buyer.

**Health and Fertility.** We maintain a thorough health and vaccination program. These bulls have all passed a health and breeding soundness examination and have been cleared for interstate transportation. All bulls tested negative for PI-BVD and trichomoniasis. They are **guaranteed breeders!**

**Semen Interests.** On designated bulls we retain the right to collect, use and market semen at some future date. As purchaser of the bull you will receive a 25 percent revenue-sharing semen interest, along with full possession of the bull. If done at all, semen will be collected at your convenience and at PCC’s expense. This in no way affects your use of the bull! Anyone with a semen interest will be allowed to collect and store semen for in-herd use with no obligation to others with a semen interest. In the event semen is marketed and revenue is produced the resulting proceeds, minus incurred expenses, shall be divided among those who own a semen interest. Designated bulls will be marked “**RETAINED SEMEN INTEREST**” in the catalog.

**Cowboy Auction.** Although our unique cowboy auction has an auction format, it has no fast-talking auctioneer and no loud, in-your-face bid takers. Everyone who has attended one of our Cowboy Auctions has appreciated and enjoyed it. Every bull will have a base price posted in this catalog. When it is time to sell a particular bull, we will ask those who are interested to raise their buyer number. If there is only one number in the air, the bull will be sold to that number at the base price. If there is more than one number in the air, we will increase the price in increments of \$250 or \$500, at the auctioneer’s discretion, until only one number remains. This provides a very simple, low-pressure way to purchase bulls. You will always know what the bid is and you will always know who is bidding against you.

The only problem with our Cowboy Auction is there can be a tie bid when the last two (or more) buyer numbers drop out at the same time. When that happens we will give the bid to the bidder with the lowest buyer number. The other bidder(s) will then be required to increase the bid by \$50 or \$100 (up to the next \$100 increment) to stay in the auction. If he increases the bid, then the bidder with the lowest buyer number can raise the bid another \$100, and so on. We can usually break a tie in 5 seconds.

**Guaranteed Calving Ease.** Most of the bulls offered in this sale could be successfully used on first-calf heifers. We rate each bull for calving ease with 1 to 5 “stars”. Our 5-star bulls would be the absolute best, but those with “3+” and “4” stars are also recommended for use on most heifers. For the most part, our 3-star bulls are breed average for Angus and Red Angus. This’s what everyone else is selling.

We are so confident in the calving ease of our 5-star calving ease bulls that we are going to do something that is unheard of in this business. We are going to provide a one-year **calving ease guarantee** on all of our 5-star bulls. For every calf you have to pull that was sired by one of our 5-star calving ease bulls we’ll pay you \$100. If a caesarean or other veterinary assistance was required, we’ll pay your vet bill. We want you to be able to look forward to your next calving season.

**Genetic Defect Guarantee.** Unlike many of our competitors, we will not sell a bull that is a potential carrier of any known genetic defect without DNA testing him to prove (guarantee) that he does not have a genetic defect gene. We guarantee that all of the bulls selling in this sale do not carry a gene for any known genetic defect.

**Repeat Buyer Discount.** There is nothing more valuable to us than a happy customer who keeps coming back. This is our way of showing our appreciation. If you purchased a bull at one of our 2021 fall sales or one of our 2022 spring sales, you will receive a **5% Discount** on all the bulls you purchase at either of these sales.

**Quantity Discounts.** To make it easier for you to purchase all your bulls at one sale, we offer quantity discounts. If you purchase five or more bulls at any one sale, we will give you a **5% Discount** on all the bulls you purchase at that sale. If you purchase ten or more bulls, we will give you a **10% Discount** on all the bulls you purchase at any one sale. Do the math — that’s **one FREE bull** for every nine that you purchase at any one sale! You cannot go together with others to receive this discount.

**You cannot combine discounts to receive a higher discount.**

**Announcements** from the Auction Block and supplemental information provided at the sale will take precedence over the printed matter in this catalog.

**Pre-Sale Meetings.** We have decided to do something a little different for our pre-sale meetings this fall. Instead of trying to find a speaker for four bull sales, we decided to host some Meet-N-Greet events the night before each sale.

**Over the years,** many have suggested we try this concept. It will allow our customers and potential customers to visit face-to-face with Kit and/or Tyson Pharo, as well as with PCC Cooperative Producers and other customers. It provides a way for likeminded people to get together and learn from one another.

We will find locations where we can eat, drink, visit and get to know one another. Since we do not have all of the details, we will provide more information on these events in our BULLETIN emails. Stay tuned!

**Drought Discount.** You won’t find anything like this anywhere else. Pharo Cattle Company likes to find unique and different ways to help our customers. We know the current drought has been very tough on many of our customers.

**With YOU in mind...** we’ll be offering a Drought Discount at our bull sales. You can receive up to a **10% Discount** on all the bulls you purchase — based on the severity of the drought in your area. This is our way of helping you make the best of a bad situation.

Our Drought Discount will be based on the *U.S. Drought Monitor Map*. It shows five levels of drought. Each level of drought is worth a 2% Discount. We will share a link to the *U.S. Drought Monitor Map* in our weekly emails.

## *PCC's One-Year Guarantee...*

Our bulls have always had a reputation for being tough as nails. They also have a reputation for being able to breed more cows for more years. Even so, problems can and do occur. Therefore, all bulls purchased at a cataloged PCC bull sale will be guaranteed for one year from the date of purchase against injury or loss that renders them incapable of breeding, with the following exceptions.

### **Exceptions:**

- Incurred during transportation
- Caused by motorized vehicle and/or equipment
- Caused by disease, nutrition or poisoning
- Caused by carelessness or neglect
- Caused by failure to maintain acceptable animal husbandry
- Caused by poor management (e.g., low cow to bull ratio)
- Caused by acts of God, war, insurrection or terrorism

This guarantee applies only to bulls that have been maintained, at all times, by the original purchaser for breeding purposes that are consistent with acceptable industry standards.

All injuries must be examined by a licensed veterinarian within 48 hours of injury. If the attending veterinarian deems treatment would be in the best interest of the animal, then treatment should be administered. Customer must notify PCC immediately after the bull has been examined by the veterinarian.

A letter from the attending veterinarian that identifies the animal, identifies the problem and provides an expected prognosis will be required. Pharo Cattle Company reserves the right to get a second opinion from another veterinarian. Getting the bull back into breeding condition will always be our first and primary objective.

If it is determined that the bull has sustained permanent damage, PCC will issue a credit for the purchase price less salvage value. If it is determined the bull should be functional for the following breeding season, PCC will issue a credit for 50% of the purchase price, and the customer will keep the bull. The credit must be used at a cataloged PCC bull sale within one year of the date it was issued.

**Customer Service has always been very important to us. This will just make it easier.**

## *30-Day Warranty...*

Our 30-day Warranty covers the bull for 30 days after the sale. We require it on all bulls purchased through one of our three Stay-At-Home options, as well as on all bulls that will be delivered to one of our delivery points. This coverage is intended to cover liability issues and to protect the buyer's interests until the animal is safe and sound at its new home. The cost of this Warranty is **2%** of the purchase price. It will automatically be added to the purchase price of all Stay-At-Home purchases, as well as to purchases that will be delivered to one of our delivery points.

## Stay-At-Home Options...

We prefer everyone to be in attendance on sale day. Realistically, however, we know there will be some scheduling conflicts and distance limitations. In these cases, we have arranged for you to be able to participate in our bull sale on an absentee basis. Once again, we have three Stay-At-Home options for you to choose from to complement our FREE and Very Afforda-BULL delivery options.

When you register to participate via one of our Stay-At-Home options, PLEASE call PCC at 800-311-0995 to let us know what delivery point you want to use.

In an effort to cover liability issues and to protect the buyer's interests, we require that a Basic 30-Day Warranty be purchased for all bulls purchased through our Stay-At-Home options. The cost of this coverage is 2% of the purchase price. See bottom of page 6 for details.

We invite you to stop by to evaluate the bulls prior to sale day. If that's not possible, we can provide a video tape or DVD of the bulls for home viewing — call Superior Productions at **800-431-4452**. The bulls can also be viewed online prior to the sale. Watch our weekly emails for details.

**Sight-Unseen Bidding.** If you are unable to attend our sale, we can arrange to have someone confidentially handle your bidding for you. We guarantee that your bulls will be purchased at the lowest price possible. Your bids will never be abused! Over the years, 30 to 40 percent of our bulls have been sold to customers who use our Sight-Unseen (SUS) program.

If you will allow us to help select the bull(s) that best fit your needs, we will **guarantee satisfaction** on your sight-unseen purchases. Please call **Kit** or **Tyson** at **800-311-0995**, **Al DeWit** at **855-541-5412** or **Cody McDaniel** at **844-541-5412** so we can discuss your needs. Our Sight-Unseen (SUS) program takes most of the risk out of purchasing bulls. Helping you with your purchases, however, places a lot of responsibility on us, so **please call early!** Except for an emergency, all Sight-Unseen bids must be received by **5:00 pm** three days before each sale.

**Internet Bidding.** Superior Productions offers the convenience of bidding via the internet at **www.superiorclicktobid.com**. Regardless of your internet connection, you will be able to view the same video feed as seen on TV. To use this option, go to **www.superiorclicktobid.com** and follow the outlined steps. You will receive an email confirming your membership. Then you need to go back online, sign in and get registered to bid for the PCC Bull Sale. When you register to bid, be sure to ask Superior to email you their PCC Click-To-Bid tutorial. This will provide exact instructions on how to participate in our unique Cowboy Auction via the internet.

**Phone Bidding.** Many customers feel more comfortable using the phone option. With this option, you will be on the phone with a Superior representative who will pass your bids along for you. Please call Superior Productions at **800-422-2117** to register to bid. At that time, they will give you a PCC buyer number and the bid line number that you will use on sale day to place bids.

**Paying for Purchases.** Repeat customers who make purchases via one of our Stay-At-Home options will be contacted after the sale and asked to mail a check as soon as possible.

**ACH Transactions (Electronic Funds Transfer).** We now have the capability of handling your bull purchases by using an Electronic Funds Transfer. This has proven to be very quick and easy for everyone involved. If you choose to utilize this payment option, call us at **1-800-311-0995** before the sale. We will need permission to make an electronic draw from your account. **PLEASE use the Direct Debit Authorization Form provided in the back of this catalog.**

**NOTE:** This payment method will be required of all new customers who purchase bulls through one of our Stay-At-Home options.

## *Sale Information and Data — Explained*

**Actual and Adjusted Weights:** Actual birth weights, along with adjusted 205-day and off test weights, are provided for most bulls. This is good information, but it doesn't tell the whole story because the surrounding environment can greatly affect these weights. Therefore, you can't use this information to make comparisons with other herds, but you can use it to make valid comparisons within a herd. Ratios make this very easy.

**Ratios:** Ratios are provided for birth weights, 205-day weights, 470-day weights, and for rate of gain. A ratio shows how a bull compares to his within-herd contemporaries. A ratio of 100% is average, while a ratio of 105% is 5% above herd average, and a ratio of 95% is 5% below herd average. Birth weight ratios have been inverted. The lowest birth weights will have the highest ratios.

**EPDs:** EPD is short for Expected Progeny Differences. It's a prediction of the difference between the average progeny of one individual bull and the average progeny of other individual bulls. Since EPDs are able to take into account the differences that exist between environments, they can be effectively used to compare animals from different herds. Each breed association uses a different method for calculating their EPDs, so you **cannot** compare EPDs of bulls from two different breeds. Within a breed, though, EPDs can provide some very valuable information. For example, a bull with a birth weight EPD of -2.0 should sire calves that are 5 pounds lighter than a bull with a +3.0 birth weight EPD. We strive for optimum and balanced EPDs, rather than for extremes in any one trait.

**ADG on Test:** Our forage-tested bulls were tested for their ability to perform on grass. Bulls that perform well in a forage test should sire cattle that are also efficient foragers. For social reasons, we can usually only run 35 to 50 bulls in a herd. Different groups can differ substantially in their average daily gains. To avoid any confusion, we are not posting individual rates of gain. We are, however, posting individual gain indexes. This figure accurately compares each bull to his herd mates.

**Scrotal Circumference:** Actual measurements have been posted in this catalog for our forage-tested bulls. Keep in mind there is absolutely no fat in the scrotum of these range bulls. There is nothing there but testicles! It doesn't take much fat in the scrotum to increase the circumference by several centimeters. Testicle size, in relation to frame size, is a good indicator of early maturity. This trait can be passed on to a bull's daughters.

**Frame Score:** A frame score of **2.5** to **5** seems to be optimum for the cow herd, as well as the feedlot and packing plant. The smaller the frame, the more efficient the cow. The only difference between a frame 4 and a frame 5 is a couple of inches between the ground and the belly — which doesn't weigh anything and is impossible to eat! Our most efficient cows have a frame score of 2 to 4 — with enough thickness to weigh 1050 to 1250 pounds.

Frame score is hip height adjusted for age. Unfortunately, the formula used for young bulls is based on feedlot-developed bulls. It will not work on our forage or grain-free-developed bulls. Therefore, we use XS, S, S/M, M, M/L and L (roughly equivalent to frames 2.5 to 5.5).

**Our Predictions:** We have provided some predictions on how we feel these bulls should be rated for **Calving Ease, Disposition, Fleshing Ability, Low Maintenance, Hair Coat** and **Grass Efficiency**. Each bull is rated with 1 to 5 stars, with 5 being the best and 3 being about average. Fleshing Ability, Disposition, Hair Coat and Grass Efficiency are discussed on pages 10 and 11.

**Maternal Information:** Valuable information has also been provided on the mother of most bulls. **Cow Age** is the dam's age at calving. At calving we give each cow an **Udder Score** from 1 to 5. A score of 3 would be an average, yet very functional udder, while a score of 5 would be nearly perfect. On the registered bulls, we are also able to calculate a **Cow Longevity** score from 1 to 5 — with 5 being the best. It's rare to have a bull with a young dam have 5 stars for cow longevity, but it is possible.

## *Ultrasound Scanning*

There has been a rapid-growing interest in grass-based genetics and grass-fed beef. In the past ten years, we have sold bulls and semen to well over 100 people who produce and market grass-fed beef. Although that is a small share of our overall market, it is still quite significant.

Finding genetics that work well in a grass-based program is becoming more and more difficult in the industry's corn-based genetic pool. To enable producers to more quickly identify cattle with the genetic makeup to excel in a grass-finishing program, scientists have perfected a live animal carcass software

program specifically for that purpose. We have been using this program since the spring of 2006. Cattle that can produce a superior carcass on nothing but grass will be able to do the same thing on grain.

All of the bulls in our fall sales have been scanned by Clay Nash. We believe you will find this data to be quite impressive. The ultrasound data, along with more explanation, can be found on pages 159 to 171. For help in using this information, feel free to call Clay at 870-897-3167. We also suggest you read the article Dr. Williams wrote on page 158.

## *Low-Maintenance*

Many of the traits we now measure and have EPDs for do not have a direct effect on ranch profits. Several breed associations are working on ways to quantify and compare a few economically relevant traits (ERTs). These are traits that directly affect profits.

There are two relatively new ERTs that everyone at Pharo Cattle Company is extremely excited about. They predict the amount of energy required by mature cows to maintain body weight. We've known for many, many years that this is something that can have a tremendous impact on ranch profits.

The Angus Association has created a Cow Energy Value (\$EN) EPD. The higher the number the better. The Red Angus Association has a similar EPD called the Maintenance Energy (ME) EPD. The lower the number the better.

Nearly all the bulls promoted by the big-name AI companies and mainstream seedstock producers literally stink in the area of cow energy requirements. They have way too much milk, growth and size to fit in a real-world, commercial ranch environment. In contrast, nearly all of the genetics used by Pharo Cattle Company excel in this area — REALLY excel!

## *Cow Longevity*

How can you identify the most efficient and most profitable cows in a cowherd? The answer is so simple that most people miss it. The most efficient and profitable cows in an unpampered cowherd will always be the oldest cows. These are cows that have done everything right without missing for at least twelve years.

Honest, unpampered, teenage cows have addressed all of the issues relative to fertility, energy requirements, frame size, production, structural soundness, mothering ability and disposition. These are time-proven cows that can seldom be improved upon.

Cow longevity is the most important trait to select for because it encompasses all of the other important maternal traits. We have devised a formula, based on all the cows in a 4-generation pedigree, to calculate a longevity score for all of the registered bulls in this sale. Scores range from 1 to 5 stars, with 5 being the very best.

Our formula may not be perfect, but it allows us to determine which bulls are most likely to produce daughters that will keep going and going and going. In time, we will probably make slight adjustments to our formula.

## ***Quick-Sort Program***

We now have the ability to help you quickly sort out the bulls that fit your wants and needs. This program will save you hours and hours of time and frustration.

We have an easy, do-it-yourself version available in our online (internet) catalog. Just enter the criteria you want to sort for, and before you can go get a cup of coffee the sorting will be completed. If you prefer, we can do the sorting for you. Call us at **800-311-0995**.

We suggest you DON'T select for any more criteria than absolutely necessary — unless you have an unlimited bull-buying budget. If your budget has some limits, however, we strongly urge you to keep your list of potential bulls as long as possible. Please keep in mind that more is NOT always better.

### **Sorting Criteria**

- Breed
- Sire
- Base Price
- Registered or Not
- Age
- Frame Size
- Disposition
- Calving Ease
- Overall Rating
- Fleshing Ability
- Thickness Score
- Muscling Score
- Masculinity Score
- Grass Efficiency Score
- Hair Coat Score
- Fly Resistance Score
- Scrotal Circ.
- Marbling Ratio
- Tenderness Score
- High Altitude Score
- Dam Udder Score
- Dam Age

**NO ONE ELSE provides as much useful information as we do.**

**Call us at 800-311-0995**

**If we are unable to help you with your Quick Sort, we'll give you \$1000 to use toward your bull purchase.**

---

## ***Grass Efficiency***

**W**e've come to the conclusion that our grass efficiency score may be the most important score for cow-calf producers to select for. What is grass efficiency? Johan Zietsman, a rancher/consultant from Zimbabwe, says, "*Grass-efficient animals will look like eight pounds of sugar in a 5-pound sack.*" In other words, they can put a tremendous amount of weight in a relatively small package.

For the most part, the formula we use to score grass efficiency is based on early maturity. Early maturity is of utmost importance to cow-calf producers. Unfortunately, the status quo beef industry's incessant selection for more and more lean growth for the past 50 years has had a very detrimental effect on early maturity. When sexual maturity takes place, muscle and skeletal growth slow down and the animal is able to start storing up energy in the form of fat. Fat deposition is critical to reproduction.

Based on university research, we are able to use the adjusted hip height of young bulls to predict their mature weight at a body condition score of 5. An animal that is 60% of its predicted mature weight is better than one that is 50% of its predicted mature weight. Bulls with a 4+ or 5-star rating for grass efficiency will be the very best at producing early-maturing, highly-fertile, long-lasting replacement females. They will also be the very best at producing steers that will excel in a grassfed beef program.

---

## *Hair Coat*

**H**air coat is an excellent indicator of animal health and well-being. A healthy beef animal will have a vibrant-looking hair coat — slick and shiny in the summer and cuddly-looking in the winter. In contrast, an unhealthy beef animal will have a dull, dead-looking hair coat.

An animal's ability to shed off early in the spring is another very good indicator of health and well-being. The late Jan Bonsma had much to say about this subject. Among other things, he said, "In selecting livestock for functional efficiency there is no single factor which can give such positive results as early hair shedding. Animals can shed their hair early in the spring only if they are well adapted to their environment, are in good nutritional status, and have the correct hormonal balance."

We have been observing and scoring hair coat for many years. The fall of 2006, though, was the first time we put hair coat scores in a sale catalog. A 5-star hair coat is as good as they get. A 3-star hair coat is about average. If you live in a relatively hot and/or humid environment, hair coat is a trait you should pay special attention to. Bulls with a 4 or 5 star hair coat should work well in the south and southeast.

---

## *Fleshing Ability*

**T**he bulls in this catalog have all been rated for fleshing ability. Simply put, this is the animal's ability to put on and maintain good body condition, even with a limited amount of feed. When feed is plentiful they will rapidly improve their condition. Later this extra condition can serve as a reserve to help the animal survive the tougher times.

Over the years, we have noticed that our easy fleshing cows seem to breed back earlier and stay in the cowherd much longer than our hard-keeping cows. There appears to be an extremely high correlation between fertility and fleshing ability. Therefore, fleshing ability has become one of the most important economic traits we select for. Hard-keeping cows will eventually fail to breed back in a program as tough as ours. Fleshing ability is a trait that needs to be bred in — NOT fed in.

Easy-fleshing bulls should sire daughters that are easy-fleshing. Our sale bulls are rated with 1 to 5 "stars" for fleshing ability, with "5" being the best. We believe you should pay special attention to this trait if you are raising your own replacement females.

---

## *Disposition*

**P**oor disposition in a cowherd can be created by rough handling, but it is also very heritable! A bull with a bad disposition will not only cause problems himself, he will also sire replacement females with similar disposition problems. Before you know it, your entire cowherd will become much more difficult to handle and work with.

At calving we give each cow a score for disposition, from 1 to 5. If there is a problem, we eliminate it. We want a momma cow that is protective and concerned about her new baby, but not to the point that she creates a hazard to our health. Every time our cattle are sorted or run through the chute we monitor and record disposition problems. We will not tolerate cattle that are nervous, wild or hard to handle.

All of our bulls have been put through a simple test that allows us to give them a score for disposition, from 1 to 5. We sort each bull off by himself in an alley and crowd him between two people. This measures the bull's comfort zone, as well as his disposition. A bull that will stand calmly, with no signs of excitement or nervousness, will receive a high score. If a bull gets nervous and tries to run past us he will receive a low score. Each bull is rated with 1 to 5 "stars", with "5" being the best. Many of our customers say our 3-star disposition bulls are better than the bulls they've been purchasing from programs. However, if you are only purchasing one bull, we suggest you purchase bulls with a 3+ or better disposition.

## *The Traits We Evaluate...*

### *...and Score*

From the very beginning, Pharo Cattle Company has been evaluating and scoring bulls for a variety of traits — traits that most seedstock producers have never even considered. Suffice it to say, we are *Different for all the Right Reasons*. Each bull is individually sorted off and evaluated by four to six people in a 12-foot sorting alley. A rating of “5” is best, with a “3” being average. Below are the traits we evaluate and score — as well as what we are looking for. Scores for some of these traits can only be found by using our unique Quick Sort program (see page 10).

- **Fleshing Ability...** The amount of condition (fat) that a bull carries under his hide. While some bulls are able to get fat on limited feed resources, others do good just to hold their own. For the most part, we use the ultrasound measurement for back fat thickness to score this trait.
- **Thickness...** This is basically a measurement of depth and width. It has little to do with muscling. What we are looking for is the most pounds for every inch of height. High-volume animals with a lot of heart girth are the type required for low-input, grass-based programs.
- **Muscling...** Since we’re in the beef business, we need animals with substantial muscling. The best place to look for natural muscling is in the twist area (between the rear legs). Light-muscled animals are narrow and cut up high in the twist. In contrast, heavy-muscled animals are deep and wide in the twist.
- **Masculinity...** A bull should look like a bull — and the sooner he does, the better. For the most part, we are looking for the presence or absence of secondary sexual characteristics. The neck and the head are the best places to look. We like a bull with a thick, wide neck that has a very pronounced crest on top. Bulls also need to have a “bull” head — not a “cow” head.
- **Overall Rating...** This is overall visual appearance or eye appeal. While some bulls are extremely attractive, others are very plain in appearance. The most attractive bulls will usually have high scores for most of the other traits we evaluate and score — but not always.
- **Hair Coat...** Healthy, well-adapted bulls will have a lively looking hair coat year-round. During the winter months, the hair should have a soft “teddy bear” look and feel to it. In the summer, the hair coat should be short, slick and shiny — shiny enough to almost see your reflection. The presence of dull, dead hair will lower the hair coat score.
- **Fly Resistance...** This is not as difficult to evaluate and score as some think. We simply assess how many flies each bull has. There is often a big difference between bulls within the same herd. While a few bulls are black with flies, others will have very few flies. In the cool morning hours, flies will be on the animal’s back. As the day warms up, the flies will move to the shaded areas of the belly and legs.
- **Disposition...** Disposition is the last thing we evaluate and score. It is important for a bull to be separated from his herd mates for an extended period of time before we can accurately evaluate his disposition. As you are evaluating the bull for other traits, his disposition (good or bad) will begin to express itself. We like to crowd the bull from both sides to test his flight zone. Bulls that remain very calm receive a high disposition score — while those that show signs of fear, nervousness and/or aggression will receive a low score.

## Why Don't All Seedstock Producers...

- Treat their cows tougher than you treat your cows?
- Refuse to make an excuse for a cow, or give her a second chance?
- Focus on pounds per acre (profit) — instead of pounds per cow (bragging rights)?
- Develop bulls on forage — with nothing but starch-free supplements?
- Evaluate and score bulls for disposition?
- Evaluate and score bulls for hair coat and fly resistance?
- Evaluate and score bulls for feet and leg conformation?
- Evaluate and score bulls for preputial prolapse problems?
- Evaluate and score bulls for fleshing ability, thickness, muscling and masculinity?
- Evaluate and score bulls for grass efficiency, cow longevity and maintenance?
- Provide an udder score for the bulls they sell?
- Provide a One-Year Guarantee on all of the bulls they sell?
- Guarantee bulls for calving ease?
- Guarantee bulls to be free from genetic defects?
- Provide ultrasound data on the bulls they sell for carcass traits?
- Obtain a DNA profile on every bull they sell to increase accuracy of predictions?
- Control flies and other parasites with genetics — instead of toxic chemicals?
- Produce genetic strains that are adapted to heat, humidity and/or fescue?
- Invite customers to participate in bull evaluation days?
- Provide a Quick Sort program that takes the guesswork out of selecting bulls?
- Use an honest, low-pressure Cowboy Auction to sell bulls?
- Deliver bulls to over 60 delivery points across the nation?
- Provide an online discussion group with world-renowned industry experts?

# Colorado Bull Sale

**Monday, November 7, 2022**  
**1:00 PM (Mountain Time)**  
**46277 US Hwy 24**  
**Burlington, Colorado**

We have cataloged **240** bulls for our Colorado Bull Sale. All of these bulls were developed on grass near PCC Headquarters. We want these bulls to be big enough to go to work — but we do not want them to be excessively fat. We expect them to gain weight during their first breeding season. They are 16 to 18 months old. At the top of each page, it will say what breed is cataloged on that page. Bulls will sell in lot order.

**139 Angus**

**70 Red Angus**

**12 Polled Hereford**

**2 Angus Cross**

**12 Composite**

**5 Black-Hided Red Angus**

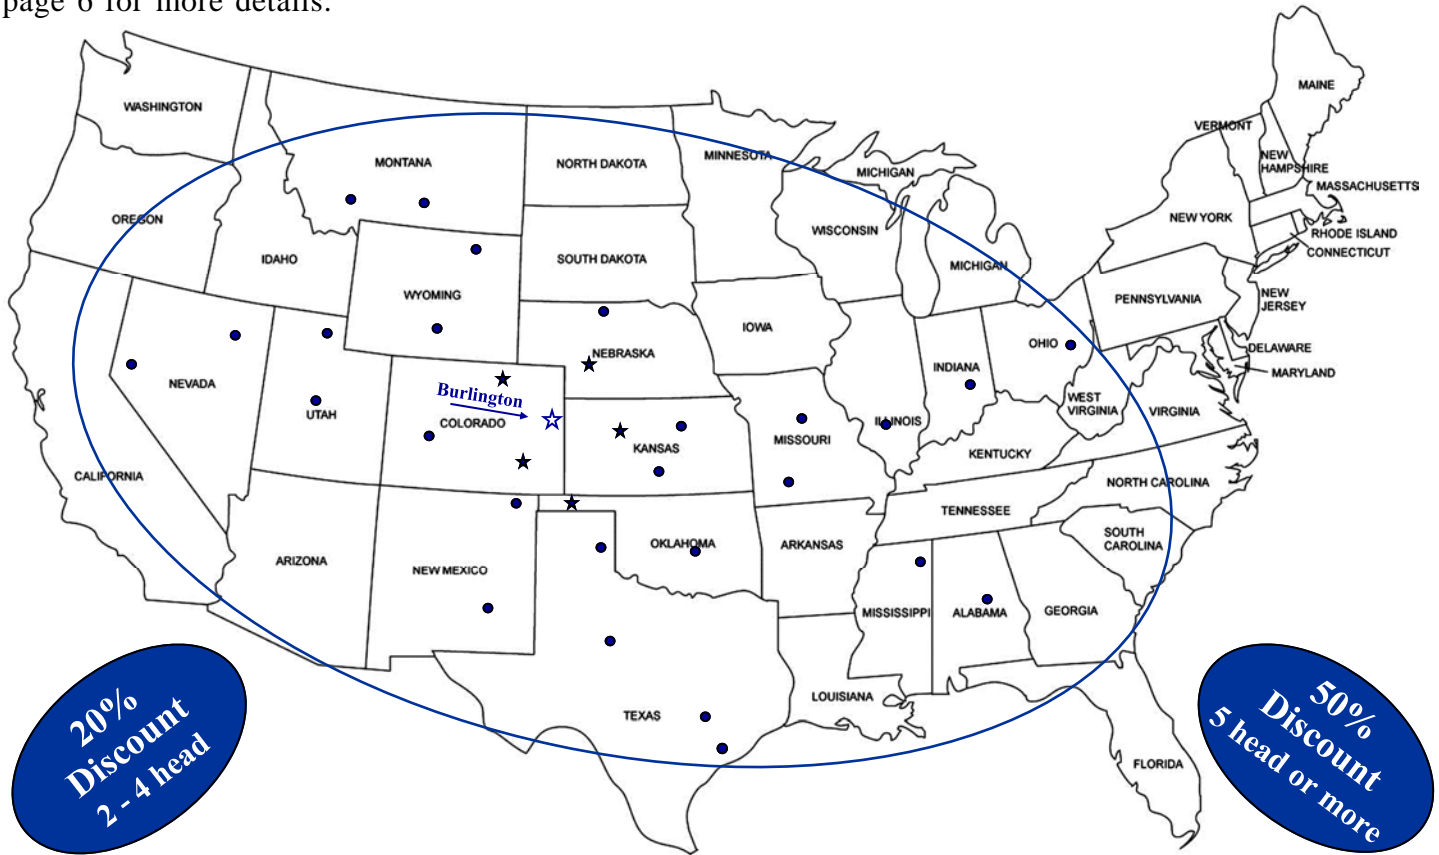

# Colorado Bull Delivery . . .

We are offering 5 FREE Delivery Points and 25 very Afford-a-BULL Delivery Points from our Colorado Sale. For \$550 above the posted price, any bull purchased in our Colorado Sale can be delivered to any of the Montana delivery points on page 93. For \$250 above the posted price, any bull purchased in our Colorado Sale can be delivered to any of the Nebraska delivery points on page 119.

Contact Pharo Cattle Company prior to the sale for specific delivery instructions for your location. If you plan to take advantage of our bull delivery service, you **must** notify PCC **before the sale** or when you clerk out **at the sale** as to which delivery point you want to use. If you don't, your bull will miss his ride and you will have to come get him. Delivery is scheduled to begin the Wednesday after the sale. We will call you when we have your transportation lined up.

To address liability issues, we require that our **Basic 30-Day Warranty** be purchased on all bulls being transported to these delivery points. The cost of this coverage is 2% of the purchase price. See page 6 for more details.

## *Two Plus Two Equals Five*

**Hybrid Vigor**, also known as heterosis, is a marked increase in performance and output that can be achieved through crossbreeding. It is equivalent to  $2 + 2 = 5$ . Although hybrid vigor is not totally free, it's as close to free as we're ever going to get. Hybrid vigor has a significant effect on growth and performance, but its greatest effect is on fertility, doability and longevity. Therefore, a crossbred cow has huge economic advantages over a purebred cow.

Here is an analogy that might make this concept a little easier to understand. Straight breeding (Angus x Angus) is like depositing money in a checking account. What you put in is exactly what you can take back out. On the other hand, crossbreeding is like depositing money in a savings account. Not only can you take out what you put in, you will also take out some accrued interest (hybrid vigor).

**Breed Complementarity** is another positive factor that can only be achieved through some form of crossbreeding. This involves taking the positive traits that exist in two different purebreds and putting them together in a crossbred animal. In other words, the traits of one breed will complement the traits of another breed when they are combined.

A crossbred range cow should be 50% to 100% English (Angus, Hereford, Red Angus) breeding. She should never be over 50% Continental (Tarentaise, Gelbvieh, Simmental) breeding. Since some continental breeds are not maternal in nature they should seldom, if ever, be used to produce replacement heifers.

Crossbred calves that seem to perform the best in the feedlot and on the rail will be 50% to 75% English breeding and 25% to 50% Continental breeding. Although 100% English bred calves cannot compete with continental-cross calves for cutability, they excel in the white table cloth market, as well as the grass-fed beef market.

**Commercial ranchers** need to be working with a crossbred cowherd, because they cannot afford to give up the advantages of hybrid vigor and breed complementarity. However, managing an effective crossbreeding system requires some forethought and discipline. You can't just buy the cheapest bulls that meet your basic color requirements. Take time to make a plan and then stick with it.

Pharo Cattle Company can provide all the genetic ingredients for a successful crossbreeding system. This sale has a great selection of *Angus*, *Red Angus*, and *Composite* bulls to choose from. We are a no-nonsense seedstock producer who has always selected for efficient, moderate-sized, maternal cattle. Our cows run on short native grass year-round with minimum supplementation.

**Keeping it simple.** If you would like the advantages of hybrid vigor and breed complementarity without all the problems and headaches involved in managing a crossbreeding system, you might consider using our Composite bulls. Traditional crossbreeding requires all cows to be identified and sorted into different breeding pastures to be bred by bulls of different breeds. For many this requires too much time and management. Most crossbreeding systems will also produce a lack of uniformity because calves are sired by two or more different breeds of bulls.

Composite bulls enable you to run your entire cowherd together with one set of bulls, if so desired. Record keeping and sorting can be minimized. This also makes it possible for you to implement a rotational grazing system.

Our Composite bulls can simplify your breeding system, as well as move your program in the right direction. They're 50% to 75% English breeding and 25% to 50% Continental breeding, and they can be either red or black in color.

**Check Out our Composite Bulls on the Next Several Pages**

*"When I heard that my buyer number got the bid on the second Composite I was overjoyed. He had 5- star ratings on the things that we thought were important.*

*"I just sold the first bull I bought from you. I believe I used him five seasons. He was never fed anything but cornstalks, grass or hay in the winter. I salvaged within \$100 dollars of the original purchase price. I would say that's pretty efficient. I sold him because I have been saving a lot of his daughters. Thanks."*

# Alabama Bull Sale

**Saturday, November 12, 2022**

**1:00 PM (Central Time)**

**8415 State Highway 97 S**

**Letohatchee, Alabama**

**W**e have cataloged **56** bulls for our Alabama Bull Sale. All of these bulls were developed on grass in east Texas. We want these bulls to be big enough to go to work — but we do not want them to be excessively fat. We expect them to gain weight during their first breeding season. They are 16 to 18 months old. At the top of each page, it will say what breed is cataloged on that page. Bulls will sell in lot order.

**18 South Poll**

**38 Heat-Tolerant Composites**

## Alabama Bull Delivery . . .

We are offering 11 very Afforda-BULL Delivery Points from our Alabama Sale. Contact Pharo Cattle Company prior to the sale for specific delivery instructions for your location. If you plan to take advantage of our bull delivery service, you **must** notify PCC **before the sale** or when you clerk out **at the sale** as to which delivery point you want to use. If you don't, your bull will miss his ride and you will have to come get him. Some bulls may leave as early as Saturday afternoon (sale day). We will call you when we have your transportation lined up.

To address liability issues, we require that our **Basic 30-Day Warranty** be purchased on all bulls being transported to these delivery points. The cost of this coverage is 2% of the purchase price. See page 6 for more details.

### Afforda-BULL Delivery ●

AL — Webb .....	\$75
AR — Leslie .....	\$450

~ Alabama Heat-Tolerant Composite Bulls ~

Since 2015, we have been experimenting with several different breeds and breed combinations to come up with some excellent genetic solutions to heat stress. The one thing we want to minimize is the use of Brahman genetics. Although Brahman cattle excel in heat tolerance, they are too big and inefficient to fit our low-input program. Brahman and Brahman-cross cattle also lack fertility, which is the most important economic trait for cow-calf producers. Two more problems with Brahman-cross cattle are disposition and carcass quality.

For the most part, we are experimenting with Bos Taurus breeds of cattle that have Spanish and/or African origins. These include Mashona, Creollo, Romosinuano, Tuli, and Senepol. Although we are working with some purebred tropical cattle, we much prefer to create composite breeds that are the result of using our thick, easy-fleshing, moderate-sized Red Angus cattle as the base. The resulting composite cattle have a much more acceptable and marketable appearance.

For well over 20 years, we have had slick-haired Angus, Red Angus and Polled Hereford cattle working in hot, humid environments. We now have some Heat-Tolerant Composite cattle that work even better.

# Montana Bull Sale

Saturday, November 19, 2022

1:00 PM (Mountain Time)

25 Wheatland Road  
Three Forks, Montana

We have cataloged **94** bulls for our Montana Bull Sale. All of these bulls were developed on grass in central Montana. We want these bulls to be big enough to go to work — but we do not want them to be excessively fat. We expect them to gain weight during their first breeding season. They are 16 to 18 months old. At the top of each page, it will say what breed is cataloged on that page. Bulls will sell in lot order.

**66 Angus**

**24 Red Angus**

**3 Black-Hided Red Angus**

**1 Angus Cross**

## Montana Bull Delivery . . .

We are offering 2 FREE Delivery Points and 15 very Afforda-BULL Delivery Points from our Montana Sale. For \$400 above the posted price, any bull purchased in our Montana Sale can be delivered to any of the Nebraska delivery points on page 119.

Contact Pharo Cattle Company prior to the sale for specific delivery instructions for your location. If you plan to take advantage of our bull delivery service, you **must** notify PCC **before the sale** or when you clerk out **at the sale** as to which delivery point you want to use. If you don't, your bull will miss his ride and you will have to come get him. Some bulls may leave as early as Saturday afternoon (sale day). We will call you when we have your transportation lined up.

To address liability issues, we require that our **Basic 30-Day Warranty** be purchased on all bulls being transported to these delivery points. The cost of this coverage is 2% of the purchase price. See page 6 for more details.

### FREE Delivery ★

*"I just sold one of my first PCC bulls at age 12. I can't ever remember him getting out or causing any kind of problem. You could always tell when he was done with the cows, he would be lying under a tree chewing his cud watching the world go by. This last year he was on 30 head of older cows. When preg checked all were bred. They all calved in 30 days. He was, without a doubt, the best bull I have ever seen."*

# Nebraska Bull Sale

Saturday, December 3, 2022

1:00 PM (Central Time)

126 N. Government

Valentine, Nebraska

We have cataloged **147** bulls for our Nebraska Bull Sale. All of these bulls were developed on grass in north central Nebraska. We want these bulls to be big enough to go to work — but we do not want them to be excessively fat. We expect them to gain weight during their first breeding season. They are 16 to 18 months old. At the top of each page, it will say what breed is cataloged on that page. Bulls will sell in lot order.

**93 Angus**

**40 Red Angus**

**8 Black-Hided Red Angus**

**6 Composites**

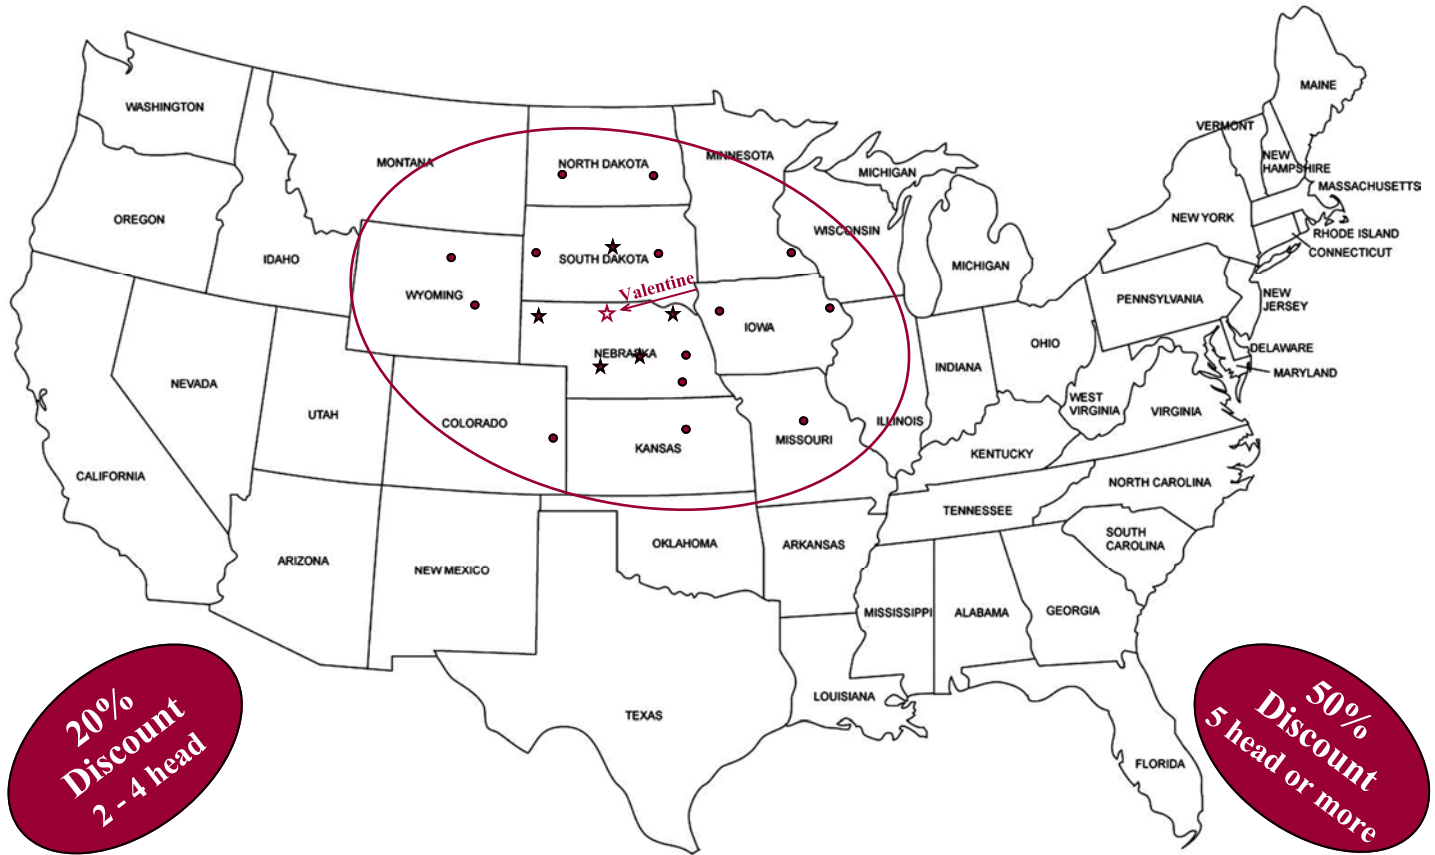

## Nebraska Bull Delivery . . .

We are offering 5 FREE Delivery Points and 14 very Afforda-BULL Delivery Points from our Nebraska Sale.

Contact Pharo Cattle Company prior to the sale for specific delivery instructions for your location. If you plan to take advantage of our bull delivery service, you **must** notify PCC **before the sale** or when you clerk out **at the sale** as to which delivery point you want to use. If you don't, your bull will miss his ride and you will have to come get him. Some bulls may leave as early as Saturday afternoon (sale day). We will call you when we have your transportation lined up.

To address liability issues, we require that our **Basic 30-Day Warranty** be purchased on all bulls being transported to these delivery points. The cost of this coverage is 2% of the purchase price. See page 6 for more details.

### FREE Delivery ★

NE — Bloomfield  
 NE — Broken Bow  
 NE — Crawford  
 NE — North Platte  
 SD — Pierre

### Afforda-BULL Delivery ●

*"We had one of your Composite bulls running on our Grazing Association this past summer. Although he was on our worst pasture, he appeared to gain weight and was in better condition than any of our other 75 bulls — and he was only a yearling! When we gathered the bulls in the fall that bull bucked and ran circles around all the other bulls as they lethargically plodded along. I was very impressed!"*

## Deprogramming...

At one time or another, all of today's cow-calf producers were programmed to think in terms of increasing pounds per cow (bragging rights). That's what the status quo industry has been single-mindedly focused on for over 40 years. As most of you know, it is not easy to deprogram oneself. The definition of deprogramming is "to release someone from previous brainwashing." Deprogramming involves a paradigm shift. It requires replacing a long-held way of thinking with a new way of thinking.

Thirty-five years ago, I came to the conclusion that the only way cow-calf producers could improve long-term, sustainable profit was to focus on increasing pounds per acre – not per cow. I struggled with the deprogramming process as much as anyone. It took me most of five years to totally break out of this status quo paradigm. Once I had been freed, I wondered why it took me so long to understand the truth. I know many of you have had a similar experience.

In preparation for our fall bull sales, I have already visited with several potential new customers who are struggling with this deprogramming process. That is understandable. I wish I could snap my fingers and create a light-bulb moment for them – but it is not that easy. If you find yourself in this situation, I encourage you to keep pushing against what you have been programmed to believe. I encourage you to look at status quo articles and advertisements in a more discerning way. When the light comes on, you too will wonder why it took so long.

**The best analogy** I have ever heard was when Johan Zietsman, a rancher and consultant from Zimbabwe, said, *"If corn farmers thought like beef producers, they would space their plants far apart and try to maximize the number of ears per plant and the number of kernels per ear. They would think nothing about yield per acre. In the end, they would all go broke."*

If the goal of a corn farmer is to increase production per plant, he would plant few plants per acre — as shown in the foreground of the picture to the right. On the other hand, if the farmer's goal was to increase production per acre, he would plant many plants per acre — as shown in the background of the picture to the right. The plants in the foreground will produce more pounds per plant — but profit will be nonexistent.

**Can you see how ridiculous it is** to focus on more pounds per cow at the expense of more pounds per acre? This is the biggest difference between high-profit producers and average producers. This is why many PCC customers are two to five times more profitable than all of their neighbors. Nothing affects profitability, or lack thereof, as much as stocking rate.

**Cowboy Logic: "Going faster in the wrong direction is NEVER the right thing to do."**

# *Ultrasound Data Explained . . .*

## ***Masculinity, Nutrition — and Bull IMF***

**By Allen R. Williams, Ph.D.**

For over a decade there has been confusion among cattlemen regarding the results of live animal carcass ultrasound and how to interpret data collected between seedstock producers. In no trait is this confusion more notable than with % IMF (intramuscular fat). This particular trait measurement is heavily impacted by several factors, including bull masculinity, degree of nutrition and bull activity (related to masculinity). These factors can greatly impact the degree to which IMF is expressed — although they do not, in any way, change the genetic potential.

### **Bull Masculinity and Activity**

Bull masculinity and degree of testicular development clearly impact the expression and ultrasonic measurement of IMF. It is important to remember that the male sex hormone testosterone is a potent IMF inhibitor. In over a decade of collecting ultrasound IMF measurements on yearling to long yearling bulls, it has become very apparent that the level of masculinity and testicular development plays a significant role in the magnitude of the ultrasound IMF measurements. In other words, bulls that are thick-muscled, exhibiting signs of heavy development of secondary sex characteristics (crest to the neck, heavy shoulders, etc.) and have good to excellent testicular development will have IMF measurements that are biased downwards due to the inhibitory effect of testosterone. Statistical analysis of IMF data, coupled with scrotal circumference data, clearly indicates a significant negative correlation between bull masculinity and actual IMF. What this means is that in many instances (not all), bulls that have a very high ultrasound IMF are often not very masculine bulls. The lower testosterone activity in these bulls allows for greater phenotypic expression of IMF, but does not give a true picture of the IMF genetic potential as compared to the very masculine bulls.

### **Bull Nutrition**

Level of nutrition leading up to the yearling stage greatly impacts expression of IMF. It has long been known that bulls developed on high concentrate rations will exhibit a higher magnitude of IMF deposition, at the same age, than bulls developed on lower concentrate or forage rations. That is one of the reasons most seedstock operations develop bulls on 50% or greater concentrate rations. The bulls gain quite a bit of condition (backfat) and lay down a higher level of intramuscular fat. Fat, slick bulls appeal to a lot of bull buyers. The problem is, you often don't know what you are really buying because fat covers over a lot of faults and can give a very false impression of actual fleshing ability. Bull buyers also like to see high ultrasound IMF scores. Again, this can lead to misinterpretation by mistaking IMF due to high concentrate feeding with actual genetic potential for IMF. Bulls can only lay down IMF to the degree to which their nutritional environment will allow. Therefore, just as with bull masculinity and activity, it is important to compare bulls within contemporary groups only and not from ranch to ranch.

### **PCC Bulls**

In the case of the PCC bulls, it is evident that many of these bulls are thick, heavily-developed bulls that exhibit a high degree of masculinity at 12-18 months of age. This masculinity, in and of itself, will inhibit phenotypic expression of IMF. Couple masculinity with high levels of activity — and then consider the fact that these bulls have not been fed a high-concentrate ration. Therefore, it is important that these bulls be compared for their genetic potential for IMF — not for the magnitude of their actual IMF measurements.

I have analyzed actual carcass data from progeny produced from many of the prominent bloodlines utilized within PCC seedstock, and the results clearly show that there is true genetic potential for marbling or IMF. The majority of the progeny sired by these genetics will produce grass-fed and grain-fed cattle that grade USDA low Choice or better at harvest.

## Ultrasound Data Explained . . .

The live animal carcass ultrasound used by Dr. Allen Williams and his associates is an automated, chute-side software system that captures images and calculates trait measurements on an objective basis. The traits determined by this ultrasound software are:

- **Back Fat Thickness**
- **Ribeye Shape Score**
- **Ribeye Area (REA)**
- **Ribeye Area/Hundred Weight (REA/CWT)**
- **Percent Intramuscular Fat Ratio (% IMF RATIO)**
- **Tenderness Score**

On this and the following several pages, we have posted these measurements and scores for all of the bulls in this sale — by sale and lot number.

**Ribeye Shape Score:** This score is indicative of desired shape of the ribeye muscle. It is correlated to gain efficiency, as well as to eventual yield grade, cutability, and % retail product. The score ranges from 0.0 to 1.0, with an acceptable score being 0.35 or greater. An ideal score is 0.50 or greater.

**Tenderness Score:** This score is correlated to the actual Warner-Bratzler Shear Force in a carcass ribeye steak at the 12th rib location. This score ranges from 10-50, with 20 being very tender, 30 being slightly tender, 40 being slightly tough, and 50 being tough. An ideal score is 25 or less, but 29 or less is considered acceptable in bulls.

**Back Fat** and **Intramuscular Fat** are affected by environment and feed consumption. The fact that these bulls were being run in different groups is somewhat evident by the amount of variation that exists for fat thickness and marbling. With this in mind, our ultrasound technician shaded in the scores and measurements that he would consider to be “top-sort”. Those shaded blue are considered the best scores, and those shaded tan are the next best. For more help in using this information, feel free to call Clay Nash at **870-897-3167**.

## *Cooperator Herds*

Pharo Cattle Company is much more than one family and one ranch. In reality, we could be described as a multi-family owned and operated seedstock producer.

The demand for Pharo Cattle Company bulls has increased tremendously over the past several years. In order to meet this demand and to keep our prices affordable, we thought it necessary to increase the number of bulls offered in our annual bull sales. This task is not as easy as it sounds because we refuse to sacrifice quality for quantity!

**The Solution.** Over the years our seedstock program has evolved into a network of

outstanding cooperative producers. We've been able to increase our numbers, without sacrificing quality, by selecting the best bull calves from several select cooperator herds. I'm referring to producers who have philosophies, genetics, and breeding programs very similar to our own. For the most part, these are breeders we have been working very closely with for several years.

**Biographies** for all of our cooperative producers can be found on the next few pages. These producers have signed a contract with Pharo Cattle Company. In so doing, they have agreed to abide by some strict guidelines, including the following philosophies.

### Philosophies Behind Our Bulls

- 1. Honesty and integrity will never be compromised.**
- 2. We will manage the natural resources placed under our control in a sustainable manner.**
- 3. The breed of cattle is not nearly as important as the breeding program and the philosophies that produce the cattle.**
- 4. Cows are run in a real-world environment, as tough or tougher than the environment most commercial cows are run in.**
- 5. We let the environment sort out the good ones, while we show absolutely no sympathy for open, late, or dry cows.**
- 6. We will never make an excuse for a cow. A cow must produce and wean a calf every year to remain in the herd.**
- 7. By limiting feed resources, we try to apply sufficient pressure on the cowherd to force out the unadapted and infertile animals — at least 10 percent each year.**
- 8. In addition to growth and performance, we select for some other vital economic traits like fertility, calving ease, moderate cow size, fleshing ability, structural correctness, disposition, and longevity.**
- 9. Replacement heifers are developed on a low-cost, forage-based diet with minimum supplements. We only want the most efficient and most adapted heifers to make it into the cowherd.**
- 10. A bull calf must be born unassisted from an efficient, moderate-sized cow that has never missed in order to make it into one of our bull sales.**

**Bull Selection.** When we go into these cooperative herds we are extremely selective. Performance is important, but we also select for calving ease, structural correctness, disposition, fleshing ability and thickness. In addition to all this, we require that the bulls' mothers be efficient,

moderate-sized cows that have never been pampered. We can't afford to make any mistakes because our reputation is at stake. We only want the best of the best! As time goes on, and as these herds improve we have been able to select more and more of their bulls for our program.

## *Meet The Breeders*

### **4-P — 4-P Farms**

Rod grew up as a farm boy in Eastern Colorado, and always saw farming in his future. After marrying the girl next door (Kit's sister, Kathy), he became familiar with Pharo Cattle Company's philosophies. Rod and Kathy run a small herd of registered Angus, keeping only the "best of the best" cows, i.e., those that know how to work for a living. Rod also serves as a Colorado State Representative and Kathy manages the bull data for PCC. Rod and Kathy Pelton, phone 719-342-1864 or email [rodpelton@rebeltec.net](mailto:rodpelton@rebeltec.net).

### **5PF — 5P Farms**

5P Farms is owned and operated by Rob and Donna Pierce and is located in Tahlequah, Oklahoma. Struggling to make profits with our cattle, we decided to purchase some PCC bulls in the fall of 2012 and it has definitely made "Ranching Great Again" for us! Our goal now is to help others do the same. We are blessed to be cooperative producers for PCC. Our herd is made up of Heat-Tolerant Composites as well as Red Angus. Give us a call anytime. Rob and Donna Pierce, phone 918-316-7740 or email [believersarenaministry@gmail.com](mailto:believersarenaministry@gmail.com).

### **83R — 1883 Ranch**

1883 Ranch got its start in 2019, but our roots run much deeper than that. Rufus Seth Reed Munger homesteaded in Keya Paha County, NE in 1883. Currently owned and operated by Brian & Jill Munger (5th generation) with the heavy involvement of the 6th generation: Ethan, Kylin, Colton, Keely, Kortney, and Shane, our ranch has survived the test of time and we want you to know that we are in this for the long haul. If you find yourself roaming through the Sandhills of Nebraska, stop in for a cold glass of tea or a hot cup of coffee! Brian & Jill Munger, phone 402-497-3607 (home), or 402-382-8814 (Brian Cell), or email [bjmunger@threeriver.net](mailto:bjmunger@threeriver.net).

### **BA — Bruns Angus**

Bruns Angus is owned and operated by Kirk and Kristi Bruns, along with our children Kara, Paige and Ben. Our moderate-framed Black Angus cows are well-adapted to our low-input environment. We calve in May and June, using rotational grazing in the summer and stockpile or bale grazing in the winter. We appreciate the opportunity to market our bulls with Pharo Cattle Company. Visitors are welcome any time, as seeing is believing. Kirk and Kristi Bruns, phone 402-841-3671 or email [kbruns63@yahoo.com](mailto:kbruns63@yahoo.com).

## *Meet The Breeders*

### **BSR — Bar S Ranch**

The Bar S Ranch is located near Edson, Kansas and is owned by Riley and Kelsey Shay. Riley grew up involved in PCC from an early age through his parents' ranch, raising Black Angus cattle. We bought our first Red Angus cows in 2013. We are delighted to work with Pharo Cattle Company and our goal is to produce low-input, moderate-framed cows with calving ease and fleshing ability. Please feel free to contact us, we would be happy to visit with you. Riley and Kelsey Shay, phone 785-694-2910 (home), 785-694-8300 (cell), website [www.the-sranch.com](http://www.the-sranch.com) or email [mail@the-sranch.com](mailto:mail@the-sranch.com)

### **CTM — McDaniel Farms**

We have been raising Red Angus since 1997. Producing cattle that require few inputs and calve easy is far more enjoyable (and logical) than spending time and money accommodating inefficient cows. We raise the right kind of cattle — self-sufficient, moderate-framed, and easy-fleshing cows that pass these traits on to their calves. Our biggest asset is the privilege of working with Pharo Cattle Company and all of the other like-minded producers that we appreciate so much. Find us at [mcdanielranch.com](http://mcdanielranch.com), <https://twitter.com/codymcdaniel>, and <https://mcdanielranch.wordpress.com>. Cody and Tancy McDaniel, phone 406-266-3909 (home) or 785-694-3244 (cell) or email [mcdanielcattle@gmail.com](mailto:mcdanielcattle@gmail.com).

### **D-7 — D Bar 7 Ranch**

We started out as commercial producers, and realized how tough it is to find bulls raised by low-input cows. In time, we encountered Kit Pharo and found that his philosophies really resonated with us. As seedstock producers, we focus on developing easy-fleshing, good-uddered, slick-haired cows that are productive on fescue pastures in the heat and humidity of Missouri. We feel fortunate to be associated with PCC and its progressive group of Cooperative Producers. Al and Debb DeWit, phone 918-915-0909 or email [aldewit72@gmail.com](mailto:aldewit72@gmail.com).

### **DC — Dry Creek Red Angus**

Dry Creek Red Angus, located near Goodhue Minnesota, is owned and operated by 2 generations of Luhmans. Jon and Terri along with Jared and Valarie make up the Dry Creek team that is focusing on improving the land that God has allowed us to manage. We breed cattle that thrive in our natural environment and take full advantage of our forage only program. We feel fortunate to be able to work with PCC in producing low maintenance, profit making seedstock and welcome you to come and visit. Contact Jon 651-380-9635 (cell) and [jdluhman@hotmail.com](mailto:jdluhman@hotmail.com) or Jared 507-271-5968 (cell) and [jared.luhman@gmail.com](mailto:jared.luhman@gmail.com).

## *Meet The Breeders*

### **GMJ — GMJ Cattle Farm**

Our program was started by the patriarch of our family, Glendon Spigner, and carried forward by Jason and Margaret Spigner after his passing. We have focused on registered Angus since 1990, producing medium-framed, low-maintenance cattle that can thrive in Mississippi's brutally hot and humid summers. We are pleased to be Pharo Cattle Company Cooperative Producers, and hope to continue in this role for years to come. Margaret Spigner, phone 662-862-9592 (home) or 662-401-7423 (cell) or email [spigner@nexband.com](mailto:spigner@nexband.com) or Jason Spigner, phone 662-862-6929 (home) or 662-255-7937 (cell) or [j.s.spigner@gmail.com](mailto:j.s.spigner@gmail.com).

### **D-J — David Johnson**

Our family has been developing Angus cows in southern Missouri's fescue country. We have selected for traits that work in our heat and humidity. Improving our grazing resources is a priority. Animal health and soil health and diversity of forages are among these ideas. We are focused on the genetics required in our environment because we believe if the cattle can perform here, they can thrive in most other environments. We are fortunate to be working with PCC as we approach another decade of challenges and exciting ideas. David Johnson and family 573-247-0164 (cell) or 573-729-4388 (home) or email [Dbjode@gmail.com](mailto:Dbjode@gmail.com).

### **FSR — Flying S Ranch**

Diane and I have run a low-input Angus herd since 1994, and we are proud to carry on my father's tradition of producing only the best cattle and horses. Our cows calve on Republican River bottom grass in March and April, with a minimum amount of harvested forage. They graze native grass in the summer and fall, and winter on corn stalks. Please give us a call or stop by to see us anytime. Ryan and Diane Shay, phone 785-332-3209 (home) or 785-332-5588 (cell) or email [ryan@flyingsranch.com](mailto:ryan@flyingsranch.com).

### **LCC — Lost Creek Cattle**

Sean and Kat formed Lost Creek Cattle Company in 2010 when they purchased the home quarter. Our cows have been selected to thrive on an all forage diet, and it has been the leading factor in our ability to finish cattle on grass. We have recently begun to sell pasture finished beef. We run on a combination of native and tame pastures in SW North Dakota. The bulls that we sell will help your operation by providing offspring that are easy fleshing, low maintenance animals that will thrive on your forage. Sean and Kat Weinert, phone 701-567-6635, Instagram @lostcreekcattle, website [www.lostcreekcattleco.com](http://www.lostcreekcattleco.com) or email [lostcreekcattle@hotmail.com](mailto:lostcreekcattle@hotmail.com).

## *Meet The Breeders*

### **N-K — N-K Angus**

At N-K Angus, a mix of prairie, creeks, and timber provide a great environment for our cow-calf operation. We raise all species of livestock with a holistic approach utilizing rotational grazing of cool season and fescue grasses. Pharo Cattle Company genetics, smart grass management, and calving in sync with nature = more profit and more fun! To us, being part of the PCC network is a privilege. Phil and Linda Wertenberger, 785-284-3258 (home) 785-285-0079 (cell) or email [nkangus@bbwi.net](mailto:nkangus@bbwi.net).

### **OAR — Orton Angus Ranch**

Orton Angus Ranch is owned by Jason and Chana Orton. Our daughter, Caitlin, and son, Raden, also have important roles in the operation. We purchased our first registered cows from Bruns Angus in 2017. Our ranch is located in north central Nebraska, just north of the Niobrara River on the edge of the Sandhills. We calve in May and June using rotational grazing in the summer and fall. The cattle graze mostly sub-irrigated meadows with some bale grazing in the winter. Jason and Chana Orton, phone 402-244-5264 or email [chanaorton@gmail.com](mailto:chanaorton@gmail.com).

### **OH & OHN — Ozark Hills Genetics**

Ozark Hills Genetics started in 1993 as a partnership between Jerry Hall and his son David. Our commercial cow-calf operation gradually turned into a purebred Red Angus ranch. These red cows are our passion and we are very proud of them. The "relentless pursuit of fertility, performance, and longevity" is the phrase that best describes what we do. Call anytime, or better yet, come and visit. We'd love to show you some good red cows and southern hospitality! David Hall, phone 417-293-1072 or email [david@ozarkhillsgenetics.com](mailto:david@ozarkhillsgenetics.com).

### **PAR — Pulliam Angus Ranch**

Pulliam Angus Ranch is located in the high country near Montrose, Colorado. Robert and Gina spent 17 years managing a 13,000 acre ranch in the mountains converting to PCC genetics. Pharo bulls changed everything for us, producing moderate frame, low-maintenance, fertile, calving ease cattle, as promised. We now manage our own herd of registered Angus with our sons Nathan, Jason and his wife Rachel. We are excited about the PCC program and proud to supply some high altitude PAP tested bulls for other producers. Give Robert a call or come for a visit. We love to talk about PCC! Phone 970-258-8704 or email [robert@pharocattle.com](mailto:robert@pharocattle.com).

## *Meet The Breeders*

### **PCC — Pharo Cattle Company**

The “PCC” prefix (by itself) is used to identify bulls produced by cows owned by Kit and Tyson Pharo. Some of these cows are located at PCC Headquarters in Cheyenne Wells, while others are placed in Cooperator Herds around the country. You will see the PCC prefix on Angus, Red Angus and Composite bulls. If you are passing through, we would love to give you a personal tour of our ranch and cattle. You can contact us by calling 800-311-0995 or emailing [bulls@pharocattle.com](mailto:bulls@pharocattle.com).

### **P-L — Landrigan Livestock**

Love of the cow-calf business and a ruthless practicality combined with a sense of genetic responsibility are the motivators at Landrigan Livestock. The cow test is VERY simple: calve annually in a least cost environment. Earmarks of our herd are ease of maintenance, trouble-free calving, docility, longevity, and winter forage hardiness. Our range management practices are aimed at harvesting forage as well as improving the quality of life above and below the soil surface. Paul and Janet Landrigan, phone 308-870-2411 or email [pjlandrigan@gmail.com](mailto:pjlandrigan@gmail.com).

### **R2R — R<sup>2</sup> Ranch**

Past experience has shown me that some animals could make it on the land we have, while others would need a feed bag. Multiple droughts have enabled us to cull to a core herd of low-maintenance, highly-fertile cows. We have both a direction and a destination for our herd, informed by the Pharo Cattle Company philosophies. We feel blessed by the opportunity to work with PCC and the other Cooperative Producers. Richard Luciano 512-484-5522 or Sara Toussaint-Mesa 830-481-4043 or email [Richard@R2Ranch.com](mailto:Richard@R2Ranch.com).

### **RRG — Rocking 3R Ranch**

My wife Billie and I and our 3 kids live near Hillsboro, Texas. We use management intensive grazing practices and PCC genetics to help heal and get the best production out of our land here in central Texas. Getting to work with Pharo Cattle Company and its group of progressive thinkers has been a true pleasure. We run our operation mostly on leased ground but would love to show you around. Ian Gerrish, phone 903-590-6841 or email [ianjg00@hotmail.com](mailto:ianjg00@hotmail.com).

## *Meet The Breeders*

### **RSR — Rocking S Ranch**

Rocking S Ranch is owned and operated by Nathan and Cheyanne Stevenson located south of Oakley, Kansas. Our goal is to raise cattle that are adapted to our environment, a low maintenance grass efficient herd with fleshing ability and calving ease. We want our cows to not only survive on grass alone, but to flourish without supplements. We run our cow herd on native Kansas grasslands through the summer and fall. We winter them on a variety of stalks, grassland, and stockpiled forages. Feel free to contact us any time, we'd love to visit with you. Nathan Stevenson, phone 785-953-7163 or email [Natebradley@live.com](mailto:Natebradley@live.com).

### **SCC — Shirah Cattle Company**

Shirah Cattle Company is owned and operated by Brandon and Hope Shirah and children in the extreme heat and high humidity of Southeast Alabama. In 2013, with nothing but a dream and faith in God, Shirah Cattle Company was born, using PCC genetics from the beginning. Our goals are to raise fertile, good uddered, good feet, docile, easy fleshing cattle that will breed every year until their teens on nothing but grass and mineral — the type of cattle that is PROFITABLE. We raise Red and Black Angus and Heat-Tolerant Composites. We are thankful to be a part of PCC. Brandon Shirah, phone 334-701-4659 or email [Brandons@shirahcattleco.com](mailto:Brandons@shirahcattleco.com).

### **SSCC — Seven Spades Cattle Company**

Our cattle venture started back in 1987 with 15 cows purchased with all our savings and a low-interest ag loan. After several years of breeding conventional cattle with disappointing results, Dave had some key conversations with Kit Pharo. And those talks opened the doors to the genetics we needed to become successful. If you are ever in our area and want to take a look, please call us. We would enjoy talking cows and spending time with you. Dave and Donna Gwyn, phone 719-348-5437 or email [sevenspadescattle@gmail.com](mailto:sevenspadescattle@gmail.com).

### **T&T — T & T Cattle Company**

T & T Cattle focuses on grass-based genetics that are moderate, fertile, functional, and efficient. Our cattle are low-input and perform well on grass with minimal supplementation. We emphasize "moderation in all things" and do not chase extremes. Our cattle exhibit great fleshing ability with an attractive phenotype and work well at high elevation. We run predominately registered Red Angus, but also have some Angus, SimAngus, and Hereford genetics. Bobby and Erica Thoman, phone 307-850-2129, [www.lostwellscattle.com](http://www.lostwellscattle.com) or email [rthoman@wyoming.com](mailto:rthoman@wyoming.com).

## *Meet The Breeders*

### **TCAG — Terrell Creek Adapted Genetics**

We have grown up on a Southwest Missouri grazing operation that has custom grazed almost every class of livestock. Our family has developed the bulls for PCC's Missouri program for over a decade. Growing up with these bulls, we have had a unique perspective to observe the genetics that are most adapted to the rigors of fescue and the Ozarks. Over the last several years of studying ratings, EPDs and pedigrees, we finally convinced our dad that breeding these animals is a worthy use of the Lord's resources. Jared, Jenna and Josie Salchow. Jared (417) 366-9728.

### **TCH — Turner Creek Herd**

In working with cattle, I like to remember wisdom from my Dad, such as, "You know son, the easiest way to get a cow to do what you want is to let her think it was her idea" and "If you can figure out what a cow is thinking, it will make this a lot easier." Another important philosophy I agree with comes from Pharo Cattle Company: "Raising cattle should be enjoyable *and* profitable." Eddy and Perri McMurtry, phone 806-256-2979 or email [eddy@turnercreekherd.com](mailto:eddy@turnercreekherd.com).

### **TF — Toby Foland**

I live in Wheatland, Wyoming and maintain a herd of efficient, moderate-framed Angus and Composite cows. I have been breeding my cows to Angus, Tarentaise, and Composite bulls from Pharo Cattle Company for many years. My goal is to produce efficient, easy-fleshing, good-natured cattle that optimize hybrid vigor and increase my profits. Calving in May and June has greatly reduced my input costs while shortening my calving season. Toby Foland, phone 307-331-1453 or email [tjfoland68@gmail.com](mailto:tjfoland68@gmail.com).

### **WCC — Walker Cattle Company**

Weston Walker is an 8<sup>th</sup> generation Ozarkian livestock producer who owns and operates Walker Cattle Company. The Walker program focuses on producing well-adapted cattle that fit their environment, including temperature extremes, high humidity and endophyte-infected fescue. Rigorous selection and adherence to low inputs produces cattle that can excel anywhere in the country and be efficient and profitable. The WCC program produces Red Angus & Heat-Adapted Composites. Tours and phone calls welcome, contact Weston Walker, phone 417-777-0599 or email [Weston@pharocattle.com](mailto:Weston@pharocattle.com).

## *Cowboy's Prayer*

By Badger Clark

Oh Lord, I've never lived where churches grow.  
I love creation better as it stood  
That day You finished it so long ago  
And looked upon your work and called it good.

I know that others find you in the light  
That's sifted down through tinted window panes,  
And yet I seem to feel You near tonight  
In this dim, quiet starlight on the plains.

I thank you, Lord, that I am placed so well,  
That you have made my freedom so complete;  
That I'm no slave of whistle, clock or bell,  
Nor weak-eyed prisoner of wall and street.

Just let me live my life as I've begun  
And give me work that's open to the sky.  
Make me a pardner of the wind and sun,  
And I won't ask a life that's soft or high.

Let me be easy on the man that's down;  
Let me be square and generous with all.  
I'm careless sometimes Lord, when I'm in town,  
But never let 'em say I'm mean or small.

Make me as big and open as the plains,  
As honest as the hoss between my knees,  
Clean as the wind that blows behind the rains;  
Free as a hawk that circles down the breeze.

Forgive me, Lord, if sometimes I forget.  
You know about the reasons that are hid.  
You understand the things that gall and fret;  
You know me better than my mother did.

Just keep an eye on all that's done and said  
And right me, sometimes, when I turn aside,  
And guide me on the long, dim trail ahead  
That stretches upward toward the Great Divide.
