# 47TH ANNUAL SALE

## Saturday March 11, 2023 1 PM

### Delta Sales Yard Delta Colorado

#### Address

700 West 5th Street  
Delta, Colorado 81416  
970-874-4612

#### Directions

From Highway 6 & 50, turn West on 5th to sale barn

#### Suggested Lodging

**Delta Comfort Inn** - 970-874-1000  
**Days Inn** - 970-874-9781  
Both Motels are in Delta, Co

#### Food & Refreshments

Available at the sale

#### Insurance

Available sale day. WCAA suggests you insure your purchases

#### Registration & Transfer of Papers

All bulls in this sale are registered with the American Angus Association. If you would like registration papers, please fill out the form at the office when paying for cattle.

#### Terms & Conditions

Cattle will sell under the Terms & Conditions as recommended by American Angus Association. All payments must be made to the Delta Sales Yard.

#### Announcements

Sale day announcements take precedence over printed material in this sale book or other print material associated with this sale.

#### Day Sheet

A supplemental sheet will be at the Registration/Sign In table and will include current weights, scrotal measurements (taken within the past 30 days), EPD's & Pelvic measurements (if taken)

#### Auctioneer

Dan Varner

#### Sale Manager

Hugh Hardman  
970-729-0968

#### Unable to attend bids

Contact the Auctioneer or Sale Manager - Hugh Hardman 970-729-0968 to place bids or for more information.

#### Online Bidding

To bid online, scan QR code or go to the following link. Instructions will be listed online.

[www.westerncoloradoangus.org](http://www.westerncoloradoangus.org)

#### Officers of Western Colorado Angus Association

**Mike Ripp** - President.....970-874-5127  
**Mick Cotten** - Vice President.....970-234-8461  
**Jerry Van Ness** - Secretary.....970-859-7201  
**Don Mitchell** - Treasurer.....970-270-4892  
**Hugh Hardman** - Sale Manager.....970-729-0968  
**Jason Wrich**.....970-234-4125  
**Stacy Gray**.....970-824-6702

#### Free Delivery

Any buyers purchasing 5 or more bulls may have their bulls delivered free of charge within a 300 mile radius of Delta, Colorado (See map on following page). Combined, composite loads of 5 or more bulls can qualify for free delivery to a central location, such as a sale barn, feed lot or other such location. Delivery of less than 5 bulls will be at cost for any buyer purchasing less than 5 bulls or unable to make a combined, composite load. If conditions do not permit delivery to your ranch, delivery will be made to a central location in your area (sale barn). Please check with sale manager regarding questions on delivery.

Dear Valued Buyer,

We proudly welcome you to the 47th Annual Western Colorado Angus Association Bull Sale!

We have made a lot of new changes over this past year in regards to our newly designed website. The new and improved website offers great information on PAP Testing, as well as providing you with all the cattle that are for sale through our producers. We have decided to do our online bidding through KRose Company. We are sure this will make it easier for you, the buyer, to maneuver the website and view the bulls that you need for your program, as well as making the "click to bid" option much more user friendly. Please don't forget that if you are not comfortable with the "click to bid" option, you can always call KRose Company, board members, or sale manager and they can bid for you over the phone.

The members of the WCAA appreciate the continued support of our buyers and look forward to working with individuals directly in order to find feed efficient bulls with excellent PAPs for your operation. Please feel free to contact the consignors, board members, or sale manager with any questions you may have before the sale. Our goal is to provide you with support and confidence in buying quality, high altitude cattle. We look forward to seeing all of you in the pens before the sale.

We would like to thank Dan and Holly Varner and all of the Delta Sales Yard staff for their courteous and professional customer service, which ensures a positive sale experience for both the consignors and buyers. The hard work that each individual puts in to making this day a success does not go unnoticed.

We have provided a sale order EPD and ranch listing in the front of our catalog.

We would like to thank all of you for your continued support and look forward to seeing you all on March 11th.

Sincerely,

*WCAA Sale Committee*

**MAP SHOWS FREE DELIVERY RADIUS. NOTICE THE RADIUS COVERS MOST OF COLORADO, UTAH, AND A LARGE PART OF WYOMING AND NEW MEXICO. ADDITIONAL MILES OVER 300 AT COST.**

**Sale updates will be posted on Facebook as they become available**

Crawford CO 81415  
970-234-4125  
wrichranches@gmail.com  
Lots 14, 26

# AMERICAN ANGUS ASSOCIATION SELECTION TOOLS

**Expected Progeny Difference (EPD)**, is the prediction of how future progeny of each animal are expected to perform relative to the progeny of other animals listed in the database. EPDs are expressed in units of measure for the trait, plus or minus. Interim EPDs may appear on young animals when their performance has yet to be incorporated into the American Angus Association National Cattle Evaluation (NCE) procedures. This EPD will be preceded by an "I", and may or may not include the animal's own performance record for a particular trait, depending on its availability, appropriate contemporary grouping, or data edits needed for NCE.

**Accuracy (ACC)**, is the reliability that can be placed on the EPD. An accuracy of close to 1.0 indicates higher reliability. Accuracy is impacted by the number of progeny and ancestral records included in the analysis.

## PRODUCTION

**Calving Ease Direct (CED)**, is expressed as a difference in percentage of unassisted births, with a higher value indicating greater calving ease in first-calf heifers. It predicts the average difference in ease with which a sire's calves will be born when he is bred to first-calf heifers.

**Birth Weight (BW)**, expressed in pounds, is a predictor of a sire's ability to transmit birth weight to his progeny compared to that of other sires.

**Weaning Weight (WW)**, expressed in pounds, is a predictor of a sire's ability to transmit weaning growth to his progeny compared to that of other sires.

**Yearling Weight (YW)**, expressed in pounds, is a predictor of a sire's ability to transmit yearling growth to his progeny compared to that of other sires.

**Yearling Height (YH)**, is a predictor of a sire's ability to transmit yearling height, expressed in inches, compared to the that of other sires.

**Scrotal Circumference (SC)**, expressed in centimeters, is a predictor of the difference in transmitting ability for scrotal size compared to that of other sires.

## CARCASS

**Carcass Weight (CW)**, expressed in pounds, is a predictor of the differences in hot carcass weight of a sire's progeny compared to progeny of other sires.

**Marbling (Marb)**, is expressed as a fraction of the difference in USDA marbling score of a sire's progeny compared to progeny of other sires.

**Ribeye Area (RE)**, expressed in square inches, is a predictor of the difference in ribeye area of a sire's progeny compared to progeny of other sires.

**Fat Thickness (Fat)**, expressed in inches, is a predictor of the differences in external fat thickness at the 12th rib (as measured between the 12th and 13th ribs) of a sire's progeny compared to progeny of other sires.

## MATERNAL

**Calving Ease Maternal (CEM)**, is expressed as a difference in percentage of unassisted births, with a higher value indicating greater calving ease in first-calf daughters. It predicts the average ease with which a sire's daughters will calve as first-calf heifers when compared to daughters of other sires.

**Maternal Milk (Milk)**, is a predictor of a sire's genetic merit for milk and mothering ability in his daughters compared to daughters of other sires. In other words, it is that part of a calf's weaning weight attributed to milk and mothering ability.

**Mature Weight (MW)**, expressed in pounds, is a predictor of the difference in mature weight of daughters of a sire compared to the daughters of other sires.

**Mature Height (MH)**, expressed in inches, is a predictor of the difference in mature height of a sire's daughters compared to daughters of other sires.

**Cow Energy Value (\$EN)**, expressed in dollars savings per cow per year, assesses differences in cow energy requirements as an expected dollar savings difference in daughters of sires. A larger value is more favorable when comparing two animals. Components for computing \$EN savings difference include lactation energy requirements and energy costs associated with differences in mature cow size.

## \$VALUE INDEXES

\$Value Indexes, reported in dollars per head, are multi-trait selection indexes where a higher value suggests more profit. The \$Value is an estimate of how future progeny of each sire are expected to perform, on average, compared to progeny of other sires if sires were randomly mated to cows and if calves were exposed to the same environment.

**Maternal Weaned Calf Value (\$M)**, expressed in dollars per head, predicts profitability differences in progeny due to genetics from conception to weaning. Increased selection pressure on \$M aims to decrease overall mature cow size and improve foot structure and fertility while maintaining weaning weights consistent with today's production.

**Weaned Calf Value (\$W)**, expressed in dollars per head, provides the expected difference in future progeny preweaning performance from birth to weaning. Increased selection pressure on \$W increases weaning and maternal milk traits while increasing mature cow size.

**Feedlot Value (\$F)**, expressed in dollars per head, is the expected average difference in future progeny performance for postweaning merit compared to progeny of other sires. The underlying objective assumes commercial producers will retain ownership of cattle through the feedlot phase and sell fed cattle on a carcass weight basis with no considerations of premiums or discounts for quality and yield grade.

**Grid Value (\$G)**, expressed in dollars per carcass, is the expected average difference in future progeny performance for carcass grid merit, including quality and yield grade attributes, compared to progeny of other sires.

**Beef Value (\$B)**, expressed in dollars per carcass, represents the expected average differences in the progeny postweaning performance and carcass value compared to progeny of other sires. This index assumes commercial producers wean all male and female progeny, retain ownership of these animals through the feedlot phase, and market these animals on a quality-based carcass grid.

**Combined Value (\$C)**, expressed in dollars per head, is an index which includes all traits that make up both Maternal Weaned Calf Value (\$M) and Beef Value (\$B) with the objective that commercial producers will replace 20% of their breeding females per year with replacement heifers retained within their own herd. The remaining cull heifer and steer progeny are then assumed to be sent to the feedlot where the producers retain ownership of those cattle and eventually sell them on a quality-based carcass merit grid. EPDs directly influencing a combined index are: CED, CEM, WW, YW, Milk, HP, DOC, MW, Angle, Claw, DMI, Marb, CW, RE, and Fat.

# PAP RISK FACTOR CHART - WESTERN SLOPE ANGUS ASSOCIATION

Recommendations given below based on elevation of the PAP Test and predicted elevation of the animals use.

## PAP RISK FACTOR

### LOW ELEVATION TEST CHART

#### PAP TEST CONDUCTED AT ELEVATION <4,000 FT

(40% Repeatable, Predictive Value)

PAP Measurements taken below 4,000 feet elevation should be considered a screening measurement only and the measurement not used for sale purposes

PAP Score	Use at Low Elevation (<4,000 feet)	Use at Moderate Elevation (4,000 - 5,500 feet)	Use at High Elevation (5,500-7,500 feet)	Use at Extreme (>7,500)
34-39	Low Risk	Low Risk	Moderate Risk	Moderate Risk
40-45	Low Risk	Moderate Risk	High Risk	High Risk
46-49	Moderate Risk	High Risk	Do Not Use	Do Not Use
>50	Moderate Risk	High Risk	Do Not Use	Do Not Use

## PAP RISK FACTOR

### LOW ELEVATION TEST CHART

#### PAP TEST CONDUCTED AT ELEVATION 4,000-5,500 FT

(60% Repeatable, Predictive Value)

PAP Score	Use at Low Elevation (<4,000 feet)	Use at Moderate Elevation (4,000 - 5,500 feet)	Use at High Elevation (5,500-7,500 feet)	Use at Extreme (>7,500)
34-39	Low Risk	Low Risk	Low Risk	Low Risk
40-45	Low Risk	Low Risk	Moderate Risk	Moderate Risk
46-49	Moderate Risk	High Risk	Do Not Use	Do Not Use
>50	Moderate Risk	High Risk	Do Not Use	Do Not Use

## PAP RISK FACTOR

### LOW ELEVATION TEST CHART

#### PAP TEST CONDUCTED AT ELEVATION 5,500-7,000 FT

(75-95% Repeatable, Predictive Value)

PAP Score	Use at Low Elevation (<4,000 feet)	Use at Moderate Elevation (4,000 - 5,500 feet)	Use at High Elevation (5,500-7,500 feet)	Use at Extreme (>7,500)
34-39	Low Risk	Low Risk	Low Risk	Low Risk
40-45	Low Risk	Low Risk	Low/Moderate Risk	Low/Moderate Risk
46-49	Moderate Risk	Moderate Risk	Moderate Risk	High Risk
>50	Moderate Risk	Moderate Risk	High Risk	High Risk

## PAP RISK FACTOR

### LOW ELEVATION TEST CHART

#### PAP TEST CONDUCTED AT ELEVATION >7,000 FT

(95% Repeatable, Predictive Value)

PAP Score	Use at Low Elevation (<4,000 feet)	Use at Moderate Elevation (4,000 - 5,500 feet)	Use at High Elevation (5,500-7,500 feet)	Use at Extreme (>7,500)
34-39	Low Risk	Low Risk	Low Risk	Low Risk
40-45	Low Risk	Low Risk	Low Risk	Low Risk
46-49	Moderate Risk	Moderate Risk	Moderate Risk	Moderate Risk
>50	Moderate Risk	Moderate Risk	High Risk	High Risk

\*When selecting an animal based on a PAP measurement other factors besides those listed above should be considered such as genetics or pedigree, PAP EPDs, Systolic/Diastolic pressures, breed, and previous illness

\*Special consideration should be given to the amount of time the animal was exposed to elevation (>5500 ft) prior to testing. The predictability and repeatability of the PAP measurement improves with longer the exposure to higher elevation.

\*This chart is based on animals greater than 10 months of age. Testing older animals (>12 months) results in a higher predictive and repeatability measurement.

\*Testing of younger animals (<10 months) may result in a greater variability to the predictive and repeatability measurement

#### Definitions:

\*Repeatable or Repeatability percent - this is a term used to give strength to a given PAP score predicting that if a retest PAP was carried out later in life then the score would be close to or within the same category as the original measurement. For example, a PAP measurement taken below 4,000 feet only has a 40% repeatable percent meaning that a repeat test only has a 40% chance of staying within the same risk category as the original test.

\*Predictive value - this term is closely related to repeatability percent but specifically says that the original score can accurately predict what that animal will retest in a high elevation.

\*Risk - Defined as the likelihood of an animal developing pulmonary hypertension themselves or being at risk for having a genetic predisposition for the disease.

## ABOVE AVERAGE GOALS REQUIRE TARGETED BULLS

*Aim High*

The Targeting the Brand™ logo highlights registered Angus bulls with greater genetic potential to produce calves that meet the most challenging specifications of the *Certified Angus Beef*® brand.

**Only 1 in 4 non-parent Angus bulls qualify.**

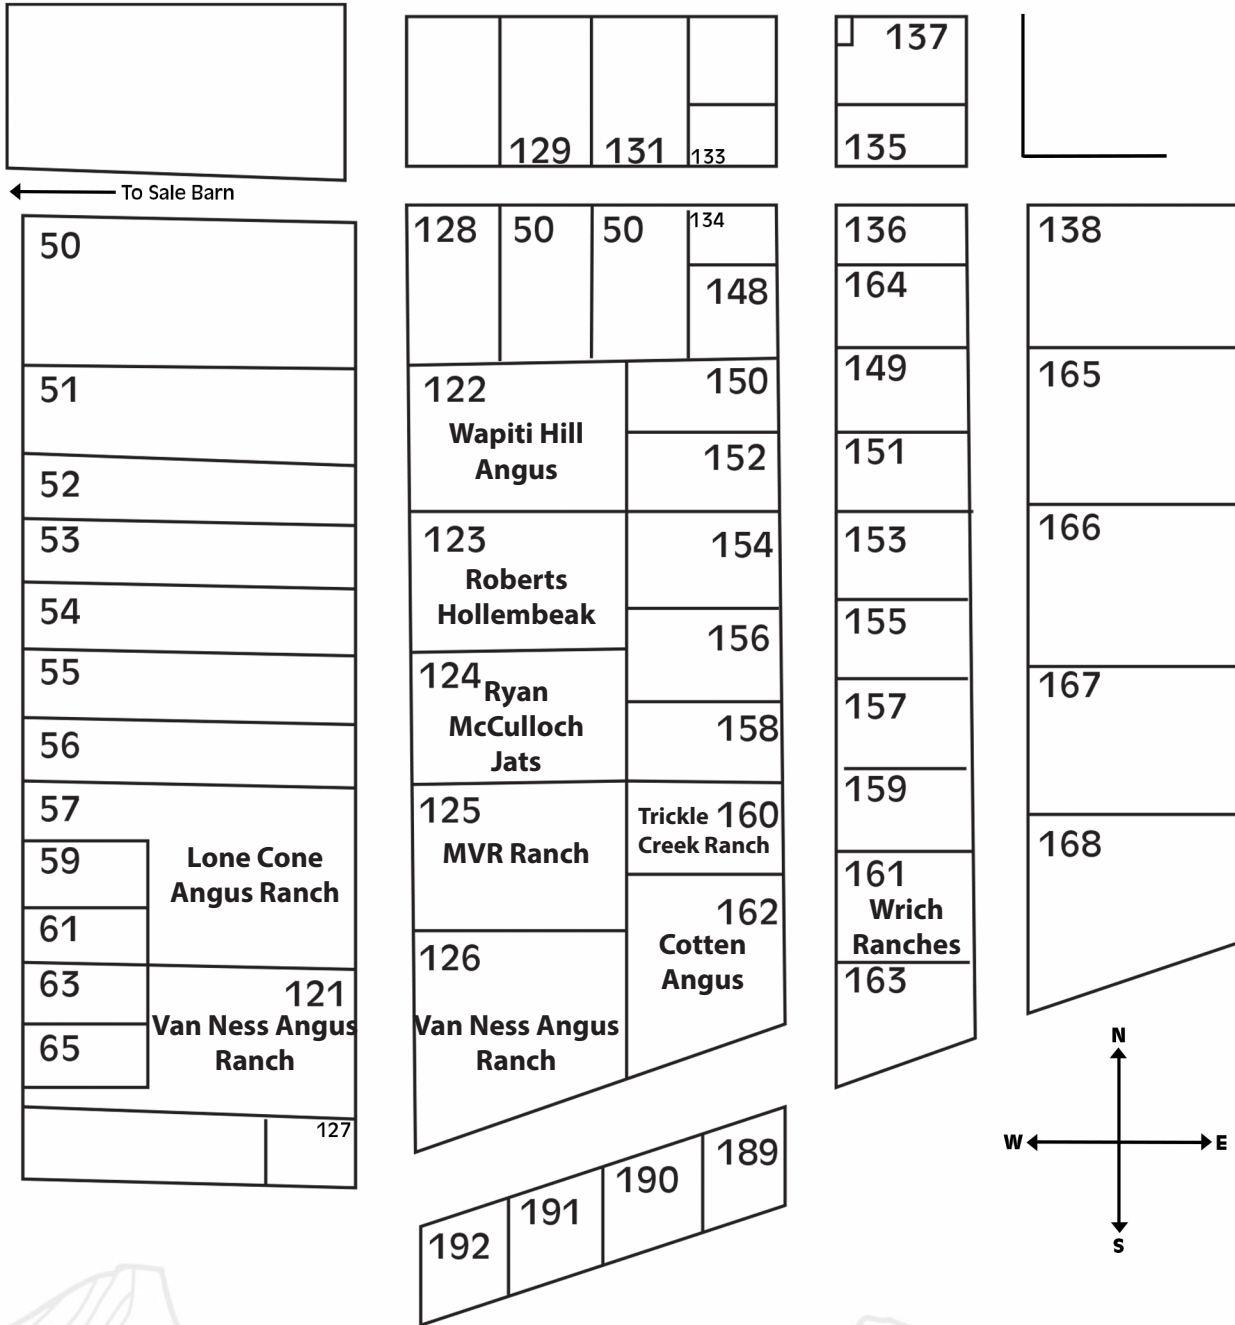

*Minimum Genetic Requirements*

Marbling EPD (Marb)	+0.65
Dollar Grid Carcass Index (\$G)	+55.0

For more information on Targeting the Brand™ visit [CABcattle.com](http://CABcattle.com).
